Threshold Concepts in Practice Ray Land, Jan H. F. Meyer, Michael T. Flanagan, 2016-07-09 Threshold Concepts in Practice brings together fifty researchers from sixteen countries and a wide variety of disciplines to analyse their teaching practice and the learning experiences of their students through the lens of the Threshold Concepts Framework In any discipline there are certain concepts the jewels in the curriculum whose acquisition is akin to passing through a portal Learners enter new conceptual and often affective territory Previously inaccessible ways of thinking or practising come into view without which they cannot progress and which offer a transformed internal view of subject landscape or even world view These conceptual gateways are integrative exposing the previously hidden interrelatedness of ideas and are irreversible However they frequently present troublesome knowledge and are often points at which students become stuck Difficulty in understanding may leave the learner in a liminal state of transition a betwixt and between space of knowing and not knowing where understanding can approximate to a form of mimicry Learners navigating such spaces report a sense of uncertainty ambiguity paradox anxiety even chaos The liminal space may equally be one of awe and wonderment Thresholds research identifies these spaces as key transformational points crucial to the learner's development but where they can oscillate and remain for considerable periods These spaces require not only conceptual but ontological and discursive shifts This volume the fourth in a tetralogy on Threshold Concepts discusses student experiences and the curriculum interventions of their teachers in a range of disciplines and professional practices including medicine law engineering architecture and military education Cover image Detail from Eve offering the apple to Adam in the Garden of Eden and the serpent c 1520 25 Lucas Cranach the Elder 1472 1553 Bridgeman Images All rights reserved

Best Practices in Professional Learning and Teacher Preparation National Assoc For Gifted Children, Angela Novak, 2021-09-03 Several states offer additional teacher preparation programs by providing either an endorsement or certification in the field but these are often pursued by teachers specifically enrolled in gifted coursework rather than in general education programs Practitioners and researchers agree that time and energy should be spent on training teachers in how to address the needs of gifted and talented students both within the regular classroom and in specialized programs This three book series acknowledges this need and provides specific strategies for professional development in a variety of settings using various methods Drawing on both literature in the field and research based best practices in professional learning this series provides the reader with a foundation for designing and implementing effective professional development experiences for educators working with gifted learners This volume Provides strategies and curricular materials resources for working with gifted learners in specific content areas i e mathematics science social studies literacy languages and the arts Discusses the importance of training teachers to use high quality curriculum Builds off of research on talent development cultural awareness and social justice in education Details instructional strategies that are appropriate for challenging gifted learners including developing growth mindset A service publication of the National Association for Gifted Children Washington DC This designation indicates that this book has been jointly developed with NAGC and that this book passes the highest standards of scholarship research and practice

Preventing Bullying Through Science, Policy, and Practice National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Biological and Psychosocial Effects of Peer Victimization: Lessons for Bullying Prevention, 2016-09-14 Bullying has long been tolerated as a rite of passage among children and adolescents There is an

implication that individuals who are bullied must have asked for this type of treatment or deserved it. Sometimes even the child who is bullied begins to internalize this idea. For many years there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate; it should not be considered a normal part of the typical social grouping that occurs throughout a child's life. Although bullying behavior endures through generations, the milieu is changing. Historically, bullying has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression: cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication. Composition of peer groups, shifting demographics, changing societal norms, and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts, and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization. Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents, educators, and school administrators, health care providers, policy makers, families, and others concerned with the care of children, this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences.

Science Education Research and Practice in Asia-Pacific and Beyond Jennifer Yeo, Tang Wee Teo, Kok-Sing Tang, 2017-10-16. This book is based on presentations at the International Science Education Conference ISEC 2014. It showcases a selection of the best papers by researchers and science teachers from the Asia Pacific region, North America, and the United Kingdom. Centered on the theme of Pushing the boundaries: Investing in our future, they pursue new ways of helping learners appreciate the diversity and changes in science that result from a globalised world facing complex and diverse environmental and technological issues. The chapters touch on various themes in science education that explore and investigate issues of scientific literacy, societal challenges, and affect and teacher professional development. Its comprehensive themes make it a valuable textbook for graduate students of master's and Ph.D. programs. It also appeals to pre-service and in-service teachers as a resource on innovative pedagogical practices and creative methods of professional development. With a selection that emphasises the research-practice nexus in education research, it serves as an introductory handbook for teachers to connect with the current issues facing science education.
