**Federal Register** ,2012-06      **How We Teach Science** John L. Rudolph,2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public      **Chemical News and Journal of Physical Science** ,1883      **The Chemical News and Journal of Physical Science** ,1904      **Stratospheric Ozone and Man** Frank A. Bower,2018-01-10 The book as originally conceived was to be limited to technical considerations but the scientific course of event has been so interwoven with non scientific but nevertheless related events the authors felt necessary to include an account of this situation Accordingly the book is divided into five sections entitled Stratospheric ozone Atmospheric processes influencing stratospheric ozone Does man influence stratospheric ozone Effects and research Public policy      Guide to U.S. Government Publications Donna Batten,2001      *Catalogue of Works (other Than Parliamentary Papers and Acts of Parliament)* Great Britain. Weldon,2020-10-06 The story of how prominent liberal intellectuals reshaped American

religious and secular institutions to promote a more democratic science centered society Winner of the Morris D Forkosch Award for Best Book by the Center for Inquiry Recent polls show that a quarter of Americans claim to have no religious affiliation identifying instead as atheists agnostics or nothing in particular A century ago a small group of American intellectuals who dubbed themselves humanists tread this same path turning to science as a major source of spiritual sustenance In *The Scientific Spirit of American Humanism* Stephen P Weldon tells the fascinating story of this group as it developed over the twentieth century following the fortunes of a few generations of radical ministers academic philosophers and prominent scientists who sought to replace traditional religion with a modern liberal scientific outlook Weldon explores humanism through the networks of friendships and institutional relationships that underlay it from philosophers preaching in synagogues and ministers editing articles of Nobel laureates to magicians invoking the scientific method Examining the development of an increasingly antagonistic engagement between religious conservatives and the secular culture of the academy Weldon explains how this conflict has shaped the discussion of science and religion in American culture He also uncovers a less known but equally influential story about the conflict within humanism itself between two very different visions of science an aspirational democratic outlook held by the followers of John Dewey on the one hand and a skeptical combative view influenced by logical positivism on the other Putting America's distinctive science talk into historical perspective Weldon shows how events such as the Pugwash movement for nuclear disarmament the ongoing evolution controversies the debunking of pseudo science and the selection of scientists and popularizers like Carl Sagan and Isaac Asimov as humanist figureheads all fit a distinctly American ethos Weldon maintains that this secular ethos gained much of its influence by tapping into the idealism found in the American radical religious tradition that includes the deism of Thomas Paine nineteenth century rationalism and free thought Protestant modernism and most important Unitarianism Drawing on archival research interviews and a thorough study of the main humanist publications *The Scientific Spirit of American Humanism* reveals a new level of detail about the personal and institutional forces that have shaped major trends in American secular culture Significantly the book shows why special attention to American liberal religiosity remains critical to a clear understanding of the scientific spirit in American culture      *Routledge Library Editions: Curriculum*

Various, 2021-07-09 Reissuing works originally published between 1971 and 1994 this collection includes books which offer a broad spectrum of views on curriculum both within individual schools and the wider issues around curriculum development reform and implementation Some cover the debate surrounding the establishment of the national curriculum in the UK while others are more international in scope Many of these books go beyond theory to discuss practical issues of real curriculum changes at primary or secondary level The Set includes books on cross curricular topics such as citizenship and environment and also guidance careers life skills and pastoral care in schools A fantastic collection of education history with much still relevant today      **Rearming for the Cold War, 1945-1960** Elliott Vanveltner Converse, 2012 Book Description The first

publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods
