Administrative Dimensions of Health and Physical Education Programs Charles Augustus Bucher, 1971 **Quality** Ivan Barofsky, 2011-10-02 Quality as exemplified by Quality of life (QoL) assessment is frequently discussed among health care professionals and often invoked as a goal for improvement but somehow rarely defined even as it is regularly assessed. It is understood that some medical patients have a better QoL than others but should the QoL achieved be compared to an ideal state or is it too personal and subjective to gauge? Can a better understanding of the concept help health care systems deliver services more effectively? Is QoL worth measuring at all? Integrating concepts from psychology, philosophy, neurocognition, and linguistics, this book attempts to answer these complex questions. It also breaks down the cognitive-linguistic components that comprise the judgment of quality, including description, evaluation, and valuations, and applies them to issues specific to individuals with chronic medical illness. In this context, quality QoL assessment becomes an essential contributor to ethical practice, a critical step towards improving the nature of social interactions. The author considers linear, non-linear, and complexity-based models in analyzing key methodology and content issues in health-related QoL assessment. This book is certain to stimulate debate in the research and scientific communities.

Its forward looking perspective takes great strides toward promoting a common cognitive linguistic model of how the judgment of quality occurs thereby contributing important conceptual and empirical tools to its varied applications including QoL assessment Young Men's Era ,1892 Popular Science ,1947-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **The R.I.
