Teaching and Digital Technologies Michael Henderson, Geoff Romeo, 2016-01-08 Teaching and Digital Technologies Big Issues and Critical Questions helps both pre service and in service teachers to critically question and evaluate the reasons for using digital technology in the classroom Unlike other resources that show how to use specific technologies and quickly become outdated this text empowers the reader to understand why they should or should not use digital technologies when it is appropriate or not and the implications arising from these decisions The text directly engages with policy the Australian Curriculum pedagogy learning and wider issues of equity access generational stereotypes and professional learning The contributors to the book are notable figures from across a broad range of Australian universities giving the text a unique relevance to Australian education while retaining its universal appeal Teaching and Digital Technologies is an essential contemporary resource for early childhood primary and secondary pre service and in service teachers in both local and international education environments

The Strongest Magnetic Fields in the Universe Vasily S. Beskin, A. Balogh, Maurizio Falanga, Maxim Lyutikov, Sandro Mereghetti, Tsvi Piran, R.A. Treumann, 2016-01-29 This volume extends the ISSI series on magnetic fields in the Universe into the domain of what are by far the strongest fields in the Universe and stronger than any field that could be produced on Earth The chapters describe the magnetic fields in non degenerate strongly magnetized stars in degenerate stars such as white dwarfs and neutron stars exotic members called magnetars and in their environments as well as magnetic fields in the environments of black holes

These strong fields have a profound effect on the behavior of matter visible in particular in highly variable processes like radiation in all known wavelengths including Gamma Ray bursts The generation and structure of such strong magnetic fields and effects on the environment are also described System Level ESD Co-Design Charvaka Duvvury,Harald

Gossner,2017-05-05 An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000 4 2 is paramount for any system design This pioneering book presents the collective knowledge of system designers and system testing experts and state of the art techniques for achieving efficient system level ESD protection with minimum impact on the system performance All categories of system failures ranging from hard to soft types are considered to review simulation and tool applications that can be used The principal focus of System Level ESD Co Design is defining and establishing the importance of co design efforts from both IC supplier and system builder perspectives ESD designers often face challenges in meeting customers system level ESD requirements and therefore a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance With contributions from Robert Ashton Jeffrey Dunnihoo Micheal Hopkins Pratik Maheshwari David Pomerence Wolfgang Reinprecht and Matti Usumaki readers benefit from hands on experience and in depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD robust systems that include mobile and automotive applications The first dedicated resource to system level ESD co design this is an essential reference for industry ESD designers system builders IC suppliers and customers and also Original Equipment Manufacturers OEMs Key features Clarifies the concept of system level ESD protection Introduces a co design approach for ESD robust systems Details soft and hard ESD fail mechanisms Detailed protection strategies for both mobile and automotive applications Explains simulation tools and methodology for system level ESD co design and overviews available test methods and standards Highlights economic benefits of system ESD co design **The Carbon Crunch** Dieter

Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies,2015 **The Natriuretic Hormones** Harvey Craig Gonick,Vardaman M.

Buckalew,2015-11-24 The title follows from the original demonstration by Dr Hugh de Wardener in 1961 that a humoral agent is produced after extracellular volume expansion which results in a vigorous diuresis and natriuresis Thus the name of natriuretic hormone was coined In the years that followed several investigators pursued the search for the hormone What resulted however was the discovery of several hormones with different characteristics all of which were natriuretic Initially it was found that the hormone was similar in action to ouabain or digoxin hence the appellation of ouabain like or digoxin like The hormone was found to be an inhibitor of Na K ATPase which would fit with it being a cardiotonic steroid On the other hand neither ouabain or digoxin migrated on Sephadex gel filtration in the same locus as the hormone Other investigators claim to have identified the hormone initially as a vanadium diascorbate later as bufadienolides such as marinobufagenin yet later as a macrocyclic derivative of inorganic carbon suboxide with a molecular weight of 408 Da Some support for the latter finding was derived from an earlier report that a semi purified Sephadex derived compound was found to have a molecular weight of about 12 000 Da but the active compound when split from its carrier protein had a molecular weight of exactly 408 Da This compound had not been further identified As further development was the demonstration by Bricker and colleagues that a natriuretic substance could be purified from uremic urine This turned out to be a xathurenic acid derivative Meanwhile the focus began to turn to natriuretic peptides derived from heart ANF and BNP These peptides have a shorter duration of action than the cardiotonic steroid like hormone and ANF has proved to be most useful as a measure of heart failure It should also be stressed that marinobufagenin like ANF is elevated in congestive heart failure whereas the steroid like hormone is depressed or absent in this state This review will attempt to describe and contrast the properties of each of the proposed natriuretic hormones including their locus on Sephadex separation potency duration of action chemical structure if known behavior in hypertension renal failure heart failure and brain disease As most recent work has focussed on marinobufagenin this hormone will be brought up to date by investigators in the field

Environmental Systems Science Daniel A.

Vallero,2021-05-27 Environmental Systems Science Theory and Practical Applications looks at pollution and environmental quality from a systems perspective Credible human and ecological risk estimation and prediction methods are described including life cycle assessment feasibility studies pollution control decision tools and approaches to determine adverse outcome pathways fate and transport sampling and analysis and cost effectiveness The book brings translational science to environmental quality applying groundbreaking methodologies like informatics data mining and applications of secondary data systems Multiple human and ecological variables are introduced and integrated to support calculations that aid environmental and public health decision making The book bridges the perspectives of scientists engineers and other professionals working in numerous environmental and public health fields addressing problems like toxic substances deforestation climate change and loss of biological diversity recommending sustainable solutions to these and other seemingly intractable environmental problems The causal agents discussed include physical chemical and biological agents

such as per and polyfluoroalkyl substances PFAS SARS CoV 2 the COVID 19 virus and other emerging contaminants Provides an optimistic and interdisciplinary approach underpinned by scientific first principles and theory to evaluate pollutant sources and sinks applying biochemodynamic methods measurements and models Deconstructs prior initiatives in environmental assessment and management using an interdisciplinary approach to evaluate what has worked and why Lays out a holistic understanding of the real impact of human activities on the current state of pollution linking the physical sciences and engineering with socioeconomic cultural perspectives and environmental justice Takes a life cycle view of human and ecological systems from the molecular to the planetary scale integrating theories and tools from various disciplines to assess the current and projected states of environmental quality Explains the elements of risk reliability and resilience of built and natural systems including discussions of toxicology sustainability and human pollutant interactions based on spatial biological and human activity information i e the exposome

Constructed Ecologies Margaret Grose, 2017-03-16 Today designers are shifting the practice of landscape architecture towards the need for a more complex understanding of ecological science *Constructed Ecologies* presents ecology as critical theory for design and provides major ideas for design that are supported with solid and

imaginative science In the questioning narrative of *Constructed Ecologies* the author discards many old and tired theories in landscape architecture With detailed documentation she casts off the savannah theory critiques the search for universals reveals the needed role of designers in large scale agriculture abandons the overlay technique of McHarg and introduces the ecological and urban health urgency of public night lighting Margaret Grose presents wide ranging new approaches and shows the importance of learning from science for design of going beyond assumptions of working in multiple rather than single issues of disrupting linear design thinking and of dealing with data This book is written with a clear voice by an ecologist and landscape architect who has led design students into loving ecological science for the support it gives design

Diversity and Universality in Causal Cognition Sieghard Beller,Andrea Bender,Michael R. Waldmann,2017-12-12 Causality is one of the core concepts in any attempt to make sense of the world and the explanations people come up with shape their judgments emotions intentions and actions This renders causal cognition a core topic for the social as well as the cognitive sciences In the past however research has been split into diverging paradigms each pertaining to a distinct sub discipline and focusing on a specific domain thus creating a rather fragmented picture of causal cognition Furthermore most of this previous research paid only incidental attention to culture as a possibly constitutive factor leaving important questions unanswered Is causality always perceived in the same way Are causal explanations affected by the concepts to which people refer and or the language they use Is causal cognition domain specific and if so how does it differ from agency construal Is causal reasoning always based on the same cognitive mechanisms or does the cultural background of people shape how they process respective information and perhaps even their willingness to search for causal explanations in the first place By soliciting contributions that address questions like these this research topic aimed at assessing the extent to which causal cognition may vary across species cultures or individuals at various stages of their development and at integrating different perspectives across a broad range of disciplines Originating from the work of a research group funded by the Center for Interdisciplinary Research ZiF at Bielefeld University Germany the scope of this research topic was broadened by inviting additional contributions from researchers with expertise in different fields of causal cognition agency construal and or cultural impacts on cognition In order to fully exploit the potential of cognitive science we explicitly encouraged submissions from scholars from all its classic sub disciplines i e anthropology artificial intelligence linguistics neuroscience philosophy psychology as well as scholars from comparative psychology cognitive archeology economics and any other discipline interested in causal cognition We welcomed empirical findings as well as theoretical contributions with an emphasis on those factors that do or may constrain trigger or shape the way in which humans and other primates think about causal relationships and inform us about both the diversity and the universality of causal cognition **Introducing the IB**
