*Opioid Dependence* Heath B. McAnally, 2017-10-07 The book begins with a public health epidemiologic examination of the situation with a systematic view of the problem based on classic infectious disease epidemiologic principles applied to this behavioral health issue This application is expanded to take into account the fact that unlike most epidemics in our species history a unique factor that must be accounted for in any public health analysis is that the host opioid dependent misusing patient is generally not under sufficiently strong motivation to avoid the disease The introduction concludes with a survey of recent containment approaches categorized epidemiologically by target agent vector host The remainder of the book is organized according to this framework addressing agent vector transmission and host respectively Sections Three and Four comprise the major focus of the book and are dedicated primarily to practical education for primary care providers in preventing opioid use disorder and overcoming it after the fact

**Introduction to Language Development** Shelia M. Kennison, 2013-07-18 There are between 4 000 and 6 000 languages remaining in the world and the characteristics of these languages vary widely How could an infant born today master any language in the world regardless of the language's characteristics Shelia M Kennison answers this question through a comprehensive introduction to language development taking a unique perspective that spans the period before

birth through old age The text offers in depth discussions on key topics including the biological basis of language perceptual development grammatical development development of lexical knowledge social aspects of language bilingualism the effect of language on thought cognitive processing in language production and comprehension language related delays and disorders and language late in life      *Loving to Survive* Dee L.R. Graham,1995-07-01 A selection of insights into the relationship between men and women Have you wondered Why women are more sympathetic than men toward O J Simpson Why women were no more supportive of the Equal Rights Amendment than men Why women are no more likely than men to support a female political candidate Why women are no more likely than men to embrace feminism a movement by about and for women Why some women stay with men who abuse them *Loving to Survive* addresses just these issues and poses a surprising answer Likening women s situation to that of hostages Dee L R Graham and her co authors argue that women bond with men and adopt men s perspective in an effort to escape the threat of men s violence against them Dee Graham s announcement in 1991 of her research on male female bonding was immediately followed by a national firestorm of media interest Her startling and provocative conclusion was covered in dozens of national newspapers and heatedly debated In *Loving to Survive* Graham provides us with a complete account of her remarkable insights into relationships between men and women In 1973 three women and one man were held hostage in one of the largest banks in Stockholm by two ex convicts These two men threatened their lives but also showed them kindness Over the course of the long ordeal the hostages came to identify with their captors developing an emotional bond with them They began to perceive the police their prospective liberators as their enemies and their captors as their friends as a source of security This seemingly bizarre reaction to captivity in which the hostages and captors mutually bond to one another has been documented in other cases as well and has become widely known as Stockholm Syndrome The authors of this book take this syndrome as their starting point to develop a new way of looking at male female relationships *Loving to Survive* considers men s violence against women as crucial to understanding women s current psychology Men s violence creates ever present and therefore often unrecognized terror in women This terror is often experienced as a fear for any woman of rape by any man or as a fear of making any man angry They propose that women s current psychology is actually a psychology of women under conditions of captivitythat is under conditions of terror caused by male violence against women Therefore women s responses to men and to male violence resemble hostages responses to captors *Loving to Survive* explores women s bonding to men as it relates to men s violence against women It proposes that like hostages who work to placate their captors lest they kill them women work to please men and from this springs women s femininity Femininity describes a set of behaviors that please men because they communicate a woman s acceptance of her subordinate status Thus feminine behaviors are in essence survival strategies Like hostages who bond to their captors women bond to men in an effort to survive This is a book that will forever change the way we look at male female relationships and women s lives      Fundamental Concepts and Skills for Nursing - E-Book
