**Petroleum and Public Safety** James B. McSwain,2018-07-06 Throughout the twentieth century cities such as Houston Galveston New Orleans and Mobile grappled with the safety hazards created by oil and gas industries as well as the role municipal governments should play in protecting the public from these threats James B McSwain s Petroleum and Public Safety reveals how officials in these cities created standards based on technical scientific and engineering knowledge to devise politically workable ordinances related to the storage and handling of fuel Each of the cities studied in this volume struggled through protracted debates regarding the regulation of crude petroleum and fuel oil sparked by the famous Spindletop strike of 1901 and the regional oil boom in the decades that followed Municipal governments sought to ensure the safety of their citizens while still reaping lucrative economic benefits from local petroleum industry activities Drawing on historical antecedents such as fire protection engineering the cities of the Gulf South came to adopt voluntary consensual fire codes issued by insurance associations and standards organizations such as the National Board of Fire Underwriters the National Fire Protection Association and the Southern Standard Building Code Conference The culmination of such efforts was the creation of the International Fire Code an overarching fire protection guide that is widely used in the United States Mexico the Caribbean and Central America In devising ordinances Gulf South officials pursued the politics of risk management as they hammered out strategies to eliminate or mitigate the dangers associated with petroleum industries and to reduce the possible consequences of catastrophic oil explosions and fires Using an array of original sources including newspapers municipal records fire insurance documents and risk management literature McSwain demonstrates that Gulf South cities played a vital role in twentieth century modernization      *The First Atomic Bomb* Janet Farrell Brodie,2023-06 2024 Southwest Book of the Year On July 16 1945 just weeks before the atomic bombing of Hiroshima and Nagasaki that brought about the surrender of Japan and the end of World War II the United States unleashed the world s first atomic bomb at the Trinity testing site located in the remote Tularosa Valley in south central New Mexico Immensely more powerful than any weapon the world had seen the bomb s effects on the surrounding and downwind communities of plants animals birds and humans have lasted decades In *The First Atomic Bomb* Janet Farrell Brodie explores the history of the Trinity test and those whose contributions have rarely if ever been discussed the men and women who constructed served and witnessed the

first test as well as the downwinders who suffered the consequences of the radiation Concentrating on these ordinary people laborers ranchers and Indigenous peoples who lived in the region and participated in the testing Brodie corrects the lack of coverage in existing scholarship on the essential details and everyday experiences of this globally significant event The First Atomic Bomb also covers the environmental preservation of the Trinity test site and compares it with the wide range of atomic sites now preserved independently or as part of the new Manhattan Project National Historical Park Although the Trinity site became a significant node for testing the new weapons of the postwar United States it is known today as an officially designated National Historic Landmark Brodie presents a timely important and innovative study of an explosion that carries special historical weight in American memory *Current Catalog* National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70

**Atomic Bill** Vincent Kiernan,2022-11-15 In Atomic Bill Vincent Kiernan examines the fraught career of New York Times science journalist William L Laurence and shows his professional and personal lives to be a cautionary tale of dangerous proximity to power Laurence was fascinated with atomic science and its militarization When the Manhattan Project drew near to perfecting the atomic bomb he was recruited to write much of the government s press materials that were distributed on the day that Hiroshima was obliterated That instantly crowned Laurence as one of the leading journalistic experts on the atomic bomb As the Cold War dawned some assessed Laurence as a propagandist defending the militarization of atomic energy For others he was a skilled science communicator who provided the public with a deep understanding of the atomic bomb Laurence leveraged his perch at the Times to engage in paid speechmaking book writing filmmaking and radio broadcasting His work for the Times declined in quality even as his relationships with people in power grew closer and more lucrative Atomic Bill reveals

extraordinary ethical lapses by Laurence such as a cheating scandal at Harvard University and plagiarizing from press releases about atomic bomb tests in the Pacific In 1963 a conflict of interest related to the 1964 World's Fair in New York City led to his forced retirement from the Times Kiernan shows Laurence to have set the trend common among today's journalists of science and technology to prioritize gee whizz coverage of discoveries That approach in which Laurence served the interests of governmental official and scientists recommends a full revision of our understanding of the dawn of the atomic era

**Greedy Science** Michael D. Gordin, W. Patrick McCray, 2025-02-18 The authors in this edited collection of essays explore this particular attribute greed by looking how it informed intersected and interlaced with science and technology and scientists and technologists during the 1980s During this decade greed although undeniably present in earlier eras became an extensive expansive and at times explicit characteristic of science both in the United States and around the world 3 The global scientific community was reshaped in a multitude of ways large and small by money fame and the pursuit of celebrity

**Mapping the Third Offset: Australia, the United States and Future War in the Indo-Pacific** Brendan Thomas-Noone, 2017-12-05 The United States is facing multiple challenges to sustaining its military technological edge in the Indo Pacific The proliferation of advanced missiles submarines satellites and other technology has raised the costs and risks for the United States in a regional conflict Access to advanced technology and innovation has spread raising the importance of the private sector in maintaining military superiority but also generating new centres of technological progress The United States current defence strategy and capabilities are increasingly economically unsustainable and its defence budget is stagnating due to political polarisation in Congress The Third Offset is a set of strategies that aims to bolster US conventional military power by mobilising innovation new technologies and institutional reform The United States is placing bets on a series of new technologies from artificial intelligence to hypersonic weapons that will allow its military to project force in contested environments Some of these technologies will in theory allow for more economically sustainable military operations and capabilities Reforming US defence institutions to prioritise innovation and seeking ways to take advantage of new technologies in the private sector are attempts to embed and sustain US military advantage The direction of the Third Offset and its success or failure should inform Australia's strategic outlook Canberra should seek to expand engagement with the Third Offset particularly through the following institutional aspects A United States Australia Defence Technology Workshop should be established to generate new ideas around Indo Pacific technological trends investment and new military concepts Canberra should explore the

possibility of hosting or jointly funding an international Defence Innovation Unit Experimental Office providing strategic coordination on technological developments resourcing and opportunities for Australian defence firms Australia needs to expand its engagement with the United States on the testing exercises and simulations that will form new Third Offset military concepts
