Lunar Meteoroid Impacts and How to Observe Them Brian Cudnik, 2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938 In it he argued that the absence of observed flashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefied lunar atmosphere The paper suggested the possibility of systematic searches for such possible lunar meteors With these concepts in mind I was surprised to note a transient moving bright speck on the Moon on July 10 1941 It appeared to behave very much as a lunar meteor would except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity Thus the idea of systematic searches for both possible lunar meteors and meteoritic impact flashes was born It was appreciated that much time might need to be expended to achieve any positive results Systematic searches were carried out by others and myself chiefly in the years 1945 1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers or ALPO The Interactive Guide to Authorware 4 Candace Garrod, 1999 Introduction to Multimedia Multimedia Authoring Web Authoring Computer Science Computer Technology Multimedia Graphics Information Systems 4 year and 2 year colleges Continuing education The Interactive Guide to AuthorWare 4 guides students through a series of projects that teach them the fundamentals of using AuthorWare Garrod covers the multimedia process cycle and design strategies In addition the text takes a case study approach with step by step instructions that guide students through the development of AuthorWare projects The accompanying CD ROM contains chapter by chapter exercise examples and software to help students complete the exercises
