Postal Service Schedule 2012:

Federal Register, 2014 **Reforming the Postal Sector in the Face of Electronic Competition**

Anheuser-Busch, 2013-01-01 Professors Crew and Kleindorfer have once again assembled a valuable collection of essays that address timely and important issues in postal sectors throughout the world. The essays employ diverse methodologies to provide useful insights about recent and likely future developments in the postal industry. This book will be a valuable resource for researchers, industry practitioners, and policymakers alike. David E. M. Sappington, University of Florida, US. In our increasingly technology-focused world, demand for traditional postal services is steadily shrinking. This timely volume examines the many challenges that the worldwide postal sector is facing as a result of growing electronic competition and offers expert recommendations for reshaping postal structures to strengthen their competitiveness in an electronic age. Drawn from a selection of papers presented at the 20th Conference on Postal and Delivery Economics in Brighton, UK, this book showcases expert contributions on the rapidly changing postal sectors in both the United States and Europe. Topics discussed include the various financial challenges posed by decreasing demand for postal services, recent changes in how postal services are provided, and new structures and modes of operation such as privatization that are currently affecting the industry. Contributors offer a thorough breakdown of the issues as well as ideas for keeping the postal sector alive in a world that is growing ever more reliant on purely electronic means of communication. Economists with an interest in regulatory economics, innovation, and public sector economics will find this volume useful and informative, as will institutional libraries and industry professionals.

Governmental Affairs,2013 US Postal service case as it strives to sustain business operations Kelly Clarkson,2013-04-29
Project Report from the year 2011 in the subject Business economics Operations Research grade A The University of
Liverpool course BA language English abstract The prevailing difficult business environment has adversely affected
companies and institutions performances globally Business entities are forced to devise innovative counter measures to curb
negative effects of such difficult economic environment Majority of companies are embarking on techniques of cutting down
operational costs with the main aim of boosting overall performance This hardly achieved as the adverse business
environment has impacted on pushing up operational costs due to effects of inflation and desire for hire wages among
employees This means that any attempts to lower operational costs will impact on reduced service level and consequently
overall performance will have to decline Attempts to raise price with the main aim of boosting revenues is also not realistic in
the prevailing business environment Customers will simply buy from competitor companies or alternatively use substitute
goods and services This due to the fact that similarly to companies consumers have also been affected by the difficult
economic conditions and are always looking of ways of minimizing their expenses Therefore the targeted profit maximization
objective is hardly achieved To survive in such an environment it is prudent to deploy alternative innovative techniques which
will boost overall revenues and lower the cost without undermining the service level It is also critical to transform public
institutions to business entities This is challenging and requires proper research on the market trends and full management
dedication This can be achieved through application of strategic management and selection which will ensure only the most
optimal decisions are made This paper explores US Postal service case as it strives to sustain business operations
