There is no Supreme Constitution Koos Malan,2019-10-04 None of the articles of faith of the South African Constitution is plausible The Constitution is not supreme and entrenched Subject to potent socio political forces it changes continuously and often profoundly regardless of

stringent amendment requirements The trite threefold separation of powers is more metaphorical than real and therefore unable to secure effective checks and balances Though institutionally separated with their own personnel and functions the three powers are ordinarily integrated in a single dominant political leadership committed to achieving the same ideological goals The bill of individual rights cannot guarantee justice because rights are subject to the ideologically driven exercise of judicial interpretation often with damaging consequences for those relying on the bill of rights This situation does not only apply to South Africa but to all Constitutions premised on the same articles of faith in this book described as the doctrine of statist individualist constitutionalism An improved mode of constitutionalism is called for one which is equipped with a sounder system of checks and balances and better endowed towards the achievement of justice through a balanced constitution

Radio, Public Life and Citizen Deliberation in South Africa Sarah Chiumbu, Gilbert Motsaathebe, 2021-05-24 This book critically analyses the important role of radio in public life in post apartheid South Africa As the most widespread and popular form of communication in the country radio occupies an essential space in the deliberation and the construction of public opinion in South Africa From just a few state controlled stations during the apartheid era there are now more than 100 radio stations reaching vast swathes of the population and providing an important space for citizens to air their views and take part in significant socio economic and political issues of the country The various contributors to this book demonstrate that whilst print and television media often serve elite interests and audiences the low cost and flexibility of radio has helped it to create a common space for national dialogue and deliberation The book also investigates the ways in which digital technologies have enhanced the consumption of radio and produced a sense of imagined community for citizens including those in marginalised communities and rural areas This book will be of interest to researchers with an interest in media politics and culture in South Africa specifically as well as those with an interest in broadcast media more generally

14th International Conference on Theory and Application of Fuzzy Systems and Soft Computing - ICAFS-2020 Rafik A. Aliev, Janusz Kacprzyk, Witold Pedrycz, Mo Jamshidi, Mustafa Babanli, Fahreddin M. Sadikoglu, 2021-01-04 This book presents

the proceedings of the 14th International Conference on Applications of Fuzzy Systems Soft Computing and Artificial Intelligence Tools ICAFS 2020 held in Budva Montenegro on August 27 28 2020 It includes contributions from diverse areas of fuzzy systems soft computing AI tools such as uncertain computation decision making under imperfect information deep learning and others The topics of the papers include theory and application of soft computing neuro fuzzy technology intelligent control deep learning machine learning fuzzy logic in data analytics evolutionary computing fuzzy logic and artificial intelligence in engineering social sciences business economics material sciences and others States of exclusion Nicolaas Buitendag, 2023-03-01 The theoretical underpinnings of public international law have taken the sovereign status of the nation state for granted since the beginning of the modern era After centuries of evolution in legal and political thought the state's definition as a bounded territorial unit has been strictly codified The legal development of the nation state was an ideological project informed by extra legal considerations Additionally the ever narrowing scope of the juridical idea of sovereignty functioned as a boundary mechanism instrumental in colonising Africa and other regions While international law claims universal liberalism today the current system based on sovereign nation states represents not social inclusion but fierce and dangerous exclusion The central thesis of this book is that the development of legal sovereignty was rather than part of the modernist progress narrative a historically contingent evolutionary regression While other social systems such as economics and science became globalised politics and law counterintuitively became more territorialised It is argued that the nation state today is not only anachronistic but is dangerously ill equipped for facing international problems such as the climate crisis or global pandemics Finally it also leaves African states and many other formerly colonised territories at a particular disadvantage by regulating their political practices into a predefined mould **A scholarly inquiry into disciplinary practices in educational institutions** Connie B. Compassion: From Neuroscience to New Horizons and Innovative, Inclusive Research Agendas Kathryn Waddington, Julian Manley, Trudi Edginton, Jason Kanov, 2024-01-11 The nature and science of compassion encompasses many aspects of human behavior social and organizational experience with resultant debate about its definition meaning and application Research theorizing and scholarship is spread across a wide range of methodological disciplinary historical and cultural perspectives including psychology sociology psychosocial studies

organizational science international politics and evolutionary studies Global concerns relating to the climate crisis COVID 19 pandemic and mass movements of displaced people all point to an urgent need for compassion in all human interactions New and innovative interdisciplinary approaches agendas and paradigms are needed to both compliment and critique existing understandings of the meaning and applications of compassion in all its diverse and complex forms In a world where there appears to be increasing demand for simplification and quantification from governments and policy makers questions must be asked about what this means for psychology and social science research The tendency towards post positivist reductionism has led to critiques that universities have become factories that produce sterile derivative unimaginative writing 21st century universities have been described as anxiety machines lacking in compassion and creating more competition and stress than knowledge Arguably research into compassion should take place in compassionate disciplinary and institutional cultures We all have a role to play in addressing the lack of compassion in universities which will involve an institutional level shift from individual level competition to group level collaboration Importantly recent advances in compassion research promise gains in understanding in both the science and neuroscience of human experience and in applications of that work to improve humankind and the world around us Qualitative research in psychology and psychosocial approaches although becoming more visible still remain a minority endeavor within the discipline This Research Topic offers the opportunity to foreground the values and virtues of qualitative psychology alongside more tried and tested approaches
