It examines the rationales, limitations, and further perspectives on transparency that have emerged in various areas of European law, including corporate law, capital markets law, and accounting law, as well as other areas of law relevant for European listed stock corporations. This book presents a clear and accurate picture of the recent reforms in the European transparency regime. In doing so, it endorses a multi-dimensional notion of transparency, highlighting the need for careful consideration and contextualisation of the transparency phenomenon. In addition, the book considers relevant enforcement mechanisms and discusses the implications of disparate enforcement concepts in European law from both the private and public law perspectives. Written by a team of distinguished contributors, the collection offers a comprehensive analysis of the European transparency regime by discussing the fundamentals of transparency, the role of disclosure in European business law, and related enforcement questions.

**Gravity at the International Criminal Court** Priya Urs, 2023-12-19 The gravity of a crime or case features in various international and national legal frameworks for the investigation and prosecution of international crimes. At the International Criminal Court (ICC), sufficient gravity is a requirement for the admissibility of a case, specified in Article 17(1)(d) of the Rome Statute. The open-textured nature of the provision leaves the manner of its application and ultimately its purpose in the context of the Prosecutor's decisions whether to investigate and prosecute open to discussion. Set against the backdrop of ongoing debates on how to justify selective investigations and prosecutions at the Court, Gravity at the International Criminal Court: Admissibility and Prosecutorial Discretion addresses the question of how the gravity criterion is to be applied in the context of the Prosecutor's respective decisions whether to investigate and prosecute. It argues that the purpose of the gravity criterion in this context is the allocation of investigative and prosecutorial resources. First, identifying appropriate indicators of gravity, the book contends that the application of Article 17(1)(d) requires a subjective assessment that involves the exercise of discretion. Second, by clarifying the respective roles of the Prosecutor and the Pre-Trial Chambers of the Court

in the assessment of gravity in different contexts it argues in favour of wide prosecutorial discretion in the making of this assessment compared with the limited powers of judicial oversight conferred on the Pre Trial Chamber Timely and thorough Gravity at the International Criminal Court proposes a more coherent and persuasive application of the criterion contextualizing and comparing the ICC s approach in relation to other courts and bodies of law including international human rights law international investment law and international trade law International Intellectual Property and the ASEAN Way Elizabeth Siew-Kuan Ng, Graeme W. Austin, 2017-10-05 The Association of Southeast Asian Nations ASEAN is actively seeking ways for member countries to enhance their individual economic development within the context of overall regional advancement Central to this is the creation of a regional intellectual property framework This book examines the efforts to move beyond sovereign protections of intellectual property rights and establish meaningful inter state cooperation on intellectual property issues Rather than aim for IP harmonization ASEAN recognizes its internal diversity and pursues an agenda of IP Interoperability The essays in this collection examine the unique dynamics of interoperability analyzing the administration of intellectual property in a part of the world that is of increasing importance The book enables the reader to compare and contrast the ASEAN model to other approaches in regional cooperation such as Europe and Latin America and also explores private international law as a potential vehicle for interoperability **The Syrian Refugee Crisis in Lebanon** Robert G. Rabil, 2016-07-29 This book examines the unfolding of the Syrian refugee crisis in relation to the spillover of the Syrian civil war in Lebanon and against the background of Lebanon Syria relations and Lebanon s socio political cultural legal and economic conditions It surveys Lebanon s response plans to the refugee crisis as part of the development of the international response plans to address the protection and needs of the Syrian refugees and Palestinian refugees from Syria as well as the impacted host communities and institutions At the same time this book emphasizes the dramatic shift in popular and institutional attitudes towards the refugees as a response to and as a growth of the sheer magnitude of the refugee crisis which made Lebanon the only country in modern history with the highest per capita concentration of refugees in the world By examining these attitudes against the background of achievements and failures of the response plans the impact of the crisis on state institutions on the local and national levels and the collective consciousness of a nation barely surviving the scars of its civil war this book not only underscores the deepening tragedy of Syrian and Palestinian refugees in Lebanon but also the consequential tragedy of many Lebanese who have been forced into poverty and whose livelihoods have been affected by insecurity and the almost complete collapse of social services As a result the tragedy of the Syrian refugee crisis has become an international crisis affecting vulnerable persons across nationalities and unless it is addressed diplomatically and its response plans sufficiently funded the tragedy will only deepen across continents **Learning to Understand Remote Sensing Images** Qi Wang, 2019-09-30 With the recent advances in remote sensing technologies for Earth observation many different remote sensors are collecting data with distinctive properties The obtained data are so

large and complex that analyzing them manually becomes impractical or even impossible Therefore understanding remote sensing images effectively in connection with physics has been the primary concern of the remote sensing research community in recent years For this purpose machine learning is thought to be a promising technique because it can make the system learn to improve itself With this distinctive characteristic the algorithms will be more adaptive automatic and intelligent This book introduces some of the most challenging issues of machine learning in the field of remote sensing and the latest advanced technologies developed for different applications It integrates with multi source multi temporal multi scale data and mainly focuses on learning to understand remote sensing images Particularly it presents many more effective techniques based on the popular concepts of deep learning and big data to reach new heights of data understanding Through reporting recent advances in the machine learning approaches towards analyzing and understanding remote sensing images this book can help readers become more familiar with knowledge frontier and foster an increased interest in this field
