The Peppered Moth Margaret Drabble, 2012-03-29 The prize winning author of *The Dark Flood Rises* offers an absorbing portrait of three generations of women inspired by her own family *The New York Times Book Review* In the early 1900s young Bessie Bawtry grows up in a mining town in South Yorkshire England Unusually gifted she longs to escape a life burdened by unquestioned tradition She studies patiently dreaming of the day when she will take the entrance exam for Cambridge and leave her narrow world A generation later Bessie's daughter Chrissie feels a similar impulse to expand her horizons which she in turn passes on to her own daughter Nearly a century after that Bessie's granddaughter finds herself listening to a lecture on genetics and biological determinism She has returned to Breaseborough and wonders at the families who remained in the humble little town where Bessie grew up Confronted with what would have been her life had her grandmother stayed she finds herself faced with difficult questions Is she really so different from the plain South Yorkshire locals As she soon learns the past has a way of reasserting itself not unlike the peppered moth that was once thought to be nearing extinction but is now enjoying a sudden and unexplained resurgence With *The Peppered Moth* the acclaimed author of *The Seven Sisters* conjures a captivating work of semi fiction grappling with her memory of her own mother and the indelible mark of family and heredity *Lancashire* John K. Walton, 1987 *Live Forever?* John S. Tregoning, 2025-01-09 Time wants you dead Not just you but your friends family pets everyone you've ever met A beautifully written book about life and death busts myths explores the stories of science and history and ultimately is rich and uplifting Dr Adam Rutherford With over 17 000 known diseases affecting humans and countless poisons carcinogens and toxins in our environment it's a miracle that our bodies manage to keep us alive And that is of course if they don't betray us themselves whether through cancers or autoimmune conditions Biomedical researcher Professor John Tregoning tells the unlikely story of how against all odds we manage to stay alive Taking an organ by organ tour of the human body Tregoning embarks on his own experimental quest testing life extending diets and exercise regimes to separate fact from fad Exploring the multitude of ways our bodies can kill us from inherited genetic conditions through heart attacks arrhythmias and angina onto the delicate workings of the brain *Live Forever* offers compelling insight into how our bodies work how we can best look after them and ultimately live longer healthier lives I heartily recommend this deep dive into wellness It turns out that none of us are getting out of here alive but John has bravely put his mind and body on the line to discover the secrets of staying healthy and happy as we get older A funny fascinating and educative book Ben Willbond co creator of *Ghosts* The idea that a book about death and dying could be a delightful read seems ridiculous and yet John Tregoning has pulled off this trick with humour flair and elegance Nessa Carey author of *The Epigenetics Revolution* An enjoyable and entertaining mixture of scientific facts about ageing and completely unscientific self experimentation recognizing that although none of us will live forever there are ways we can improve our chances of living well while we are still around Dame Sarah Gilbert **Children's Visual Dictionary**
