It covers the topics which comprise the foundation of math. It begins with practice in basic arithmetic followed by basic operations negative numbers fractions decimals percents and basic probability and statistics. If these topics are not completely mastered later work will prove to be quite difficult. This is especially true of algebra. An extensive introduction describes how to obtain the greatest benefit from the book. The book also outlines practical techniques for attaining the optimal mindset for studying math and improving scores on exams. An answer key for all exercises and self tests is included.

**CS16 Stellar Healing** C. C. Zain, 2014-04-27 This book is Course 16 in the 21 Brotherhood of Light Course series by C C Zain on the Hermetic Sciences Astrology Alchemy Tarot Kabbalah and the Occult. The book describes the substance and structure of the astral or stellar body. The author describes how natal and progressed aspects in the chart map aerials between various thought cell structures in the stellar body that pick up energy similar to a radio receiver. And since the positions of the planets in the birth chart indicate the diseases toward which an individual may be predisposed the book lists the natal and progressed planetary configurations of 160 diseases. A detailed description of how to use Astrodynes for measuring the power and harmony of planets signs and houses in both the natal and progressed chart is provided by the author who invented the concept. The book teaches the student how to use Astrodynes to determine the source within the stellar or astral body that is responsible for the individual's disease or discomfort. It then teaches the student various Stellar Treatments which are methods for applying appropriate healing energies to the compartment of the stellar body causing the problem.
