Peri Urban Water And Sanitation Services Policy Planning And Method:

Peri-urban Water and Sanitation Services Mathew Kurian, Patricia McCarney, 2010-12-02 More than 2.6 billion people in the developing world lack access to safe water and sanitation service. The Millennium Development Goals MDG target is to halve the number of people without access to a sustainable source of water supply and connection to a sewer network by 2015. That target is unlikely to be met. If there is anything that can be learnt from European experience it is that institutional reform occurs incrementally when politically enfranchised urban populations perceive a threat to their material well-being due to contamination of water sources. *Peri-urban Water and Sanitation Services* Mathew Kurian, Patricia McCarney, 2010-08-17 More than 2.6 billion people in the developing world lack access to safe water and sanitation service. The debates included highlight a number of issues in the peri-urban context such as access to water appropriate technologies and land management political economy in the peri-urban space peri-urban agriculture and place marketing in peri-urban development among others. The debates raised by the authors in this book revolve around locating the peri-urban space within the context of sustainability in which key issues are addressed. The book essentially examines peri-urban development processes from various angles in an effort to understand how peri-urban areas develop function and how their residents survive. Peri-urban dwellers currently face numerous challenges including land tenure insecurity poor infrastructure and services land use conflicts stringent planning law and land use planning regulations. This work seeks to address the knowledge gap on peri-urban development processes in Africa and is also intended to inform urban policy practice in the African Cities and beyond. Offering policy makers valuable insights on the peri-urban space it provides guidance for decision making in the contexts of service delivery land management housing new town development and place marketing among others. Governing the Nexus Mathew Kurian, Reza Ardakanian, 2014-11-08 Global trends such as urbanization demographic and climate change that are currently underway pose serious challenges to sustainable development and integrated resources management. The complex relations between demands resource availability and quality and financial and physical constraints can be addressed by knowledge based policies and reform of professional practice. The nexus approach recognizes the urgent need for this knowledge and its interpretation in a policy relevant setting that is guided by the understanding that there is a lack of blueprints for development based on integrated management of water soil and waste.

Life-cycle Cost Approach for Management of Environmental Resources V. Ratna Reddy, Mathew Kurian, Reza Ardakanian, 2014-08-22 This book demonstrates the application of Life cycle Cost Approach LCCA in the management of infrastructure and other investment projects in the context of developing countries The main goal is to identify potential opportunities for the adoption LCCA in developing countries with the help of case studies and best practices The editors observe that developing countries are plagued with poor and fluctuating service delivery which affords low or no priority for environmental protection They seek to instill at the policy making level an understanding of why life cycle cost assessment is central to achieving the goals of sustainable development as well as sustainable service delivery and to influence the behavior of sector stakeholders The editors examine the evolution of LCCA from a project appraisal tool to a more comprehensive method of incorporating sustainable development aspects in a variety of sectors By providing a compendium of concepts tools and practical experiences it seeks to broaden the application of LCCA which is often limited to specific phases of the life cycle with little or no weight given to environmental aspects The aim of the book is to mainstream LCCA into governance processes at institutional levels from local to national in order to increase the ability and willingness of decision makers both users and those involved in service planning budgeting and delivery to reach better informed and more relevant choices among different types and levels of products and services

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a

geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Blue Infrastructures Jenia Mukherjee, 2020-05-27 This book focuses on Kolkata formerly the colonial capital of and currently a major megacity in India in terms of its extensive blue infrastructures i e its rivers canals and wetlands as an integrated composite whole It unfolds ways in which this reclaimed urban space could determine and in turn could get determined by political fate economic calculations and social livelihoods across changing political economic imperatives and with large scale implications on urban sustainability Employing historical urban political ecology HUPE as the methodological framework by combining urban environmental history and urban political ecology the book studies the changing urban environmental equations through several centuries and its impact on the city and its people Weaving the past present and posterity of deltaic Kolkata the book demonstrates that it is in these blue infrastructures that the anecdote of origin the account of functioning and the apprehension of survival of the city is rooted By emphasizing the ecology of cities instead of ecology in cities approach the book exposes the limitations of contemporary ecological restructuring efforts regarding Indian cities Further it offers a blueprint for future innovative and empirical research focusing on other major cities Accordingly this topical and original book will be of interest to students and researchers of environmental humanities political ecology and urban studies

Resources, Services and Risks Mathew Kurian, Reza Ardakanian, Linda Gonçalves Veiga, Kristin Meyer, 2016-01-11 This book discusses the role of observatories in supporting evidence based decision making The book focuses on issues of data accessibility monitoring frameworks and governance processes with regard to environmental resources water soil and waste This publication highlights challenges related to policy implementation measures and examines current monitoring approaches and illustrates how the UNU FLORES Nexus Observatory seeks to overcome concerns related to data monitoring and governance of water soil and waste resources In particular given that extreme weather events such as droughts and floods are predicted to become more frequent in the future it discusses the need for improved hazard risk monitoring It proposes risk indices for drought and floods which measure exposure and vulnerability to the phenomena through a multitude of bio physical socio economic and institutional indicators Furthermore the potential for using openly accessible data made available through observatories in

decision making aimed at improving food security is also discussed. It acknowledges governments as key players in environmental resource management and recognizes that decentralization reforms as well as the emergence of information and communication technologies have significantly changed the role of governments in promoting sustainable development. The book is particularly relevant for decision makers, donor agencies, practitioners and students with an interest in environmental management who are also keen followers of discussions on the post 2015 monitoring agenda. Intergovernmental Fiscal Relations Linda Gonçalves Veiga, Mathew Kurian, Reza Ardakanian, 2014-08-14. This book examines and analyzes issues related to public finance in subnational governments along with a discussion of case studies on decentralization. Most of the analysis applies to all public goods and services provided by subnational governments, with some placed on the role of subnational governments in the management of environmental resources, notably water and waste. Coverage includes optimal arrangements for sharing fiscal responsibilities among different levels of government, the potential impact of decentralization on the quality of public goods delivery, local governments' expenditure and revenue choices, and the effect of decentralization on accountability, governance and policy outcomes. The scope of discussion extends to both public finance theory and applied policy debates. The first chapter on trends in financing of public services opens with an explanation of the how and why of government intervention in the economy, the nature and purposes of transfers between and among governments, and trends in decentralization. Case studies examine the impact of decentralization in such areas as service delivery, water and sanitation, education and health, and on poverty and income inequality. Chapter 2 examines public budgets, governance structures, norms and organizational practices, building up understanding of budgets, budget cycles, fiscal revenues from fees and taxes, expenses, debt, and political economy issues, rules mandating balanced budgets in government, and more. Chapter 3 discusses issues of accountability and policy outcomes, offering important lessons from recent international experience, including ways to strengthen political, administrative and financial accountability. The concluding chapter recounts lessons from recent international experience and surveys implications for the nexus approach to management of environmental resources. The information analysis and expert advice presented here is particularly relevant for developing and emerging countries where well designed decentralization reforms have a higher potential to improve efficiency in the provision of public services and to
