Autonomic Nervous System

The Autonomic Nervous System is part of the nervous system that regulates involuntary functions. It controls the internal organs and glands of the body.

It is divided into two main branches:

- Sympathetic Nervous System** (fight or flight)
- Parasympathetic Nervous System** (rest and digest)

The Autonomic Nervous System is responsible for controlling the following functions:

- Heart rate
- Blood pressure
- Digestion
- Respiration
- Excretion
- Reproduction

The Autonomic Nervous System is controlled by the brain and spinal cord.

Brain and Spinal Cord

The brain and spinal cord are the central parts of the nervous system. They are responsible for processing information and sending out instructions to the rest of the body.

The brain is divided into three main parts:

- Cerebrum** (the largest part, responsible for thinking and reasoning)
- Cerebellum** (responsible for balance and coordination)
- Brainstem** (responsible for basic life functions like breathing and heart rate)

The spinal cord is a long, thin structure that runs down the back. It is responsible for carrying messages between the brain and the rest of the body.

This diagram illustrates the autonomic nervous system's control over various organs. The brain (cerebrum, cerebellum, brainstem) sends signals through the spinal cord to the sympathetic and parasympathetic ganglia. These ganglia then send signals to the heart, lungs, stomach, intestines, and reproductive organs. Labels include: Cerebrum, Cerebellum, Brainstem, Sympathetic Ganglion, Parasympathetic Ganglion, Heart, Lungs, Stomach, Intestines, and Reproductive Organs.

Diagram 1: Sympathetic Nervous System

This diagram shows the sympathetic nervous system's pathway. It starts from the brainstem and travels down the spinal cord to the sympathetic ganglia. From there, it branches out to control the heart, lungs, and digestive organs. Labels include: Cerebrum, Cerebellum, Brainstem, Sympathetic Ganglion, Heart, Lungs, and Digestive Organs.

Diagram 2: Parasympathetic Nervous System

This diagram shows the parasympathetic nervous system's pathway. It starts from the brainstem and travels down the spinal cord to the parasympathetic ganglia. From there, it branches out to control the heart, lungs, and digestive organs. Labels include: Cerebrum, Cerebellum, Brainstem, Parasympathetic Ganglion, Heart, Lungs, and Digestive Organs.

Spinal Cord

The spinal cord is a long, thin structure that runs down the back. It is responsible for carrying messages between the brain and the rest of the body. It is divided into three main sections:

- Cervical** (neck)
- Thoracic** (chest)
- Lumbar** (lower back)

The spinal cord is protected by the vertebral column and meninges. It is surrounded by cerebrospinal fluid.
