Renewing Black Intellectual History Adolph Reed, Kenneth W. Warren, 2015-11-17 Reflecting critically on the discipline of African American studies is a complicated undertaking. Making sense of the black American experience requires situating it within the larger cultural, political, economic, and ideological dynamics that shape American life. This volume moves away from privileging racial commonality as the fulcrum of inquiry and moves toward observing the quality of the accounts scholars have rendered of black American life. This book maps the changing conditions of black political practice and experience from Emancipation to Obama, with excursions into the Jim Crow era, Black Power radicalism, and the Reagan revolt. Here are essays, classic and new, that define historically and conceptually discrete problems affecting black Americans as these problems have been shaped by both politics and scholarly fashion. A key goal of the book is to come to terms with the changing terrain of American life in view of major Civil Rights court decisions and legislation.

Schools of Fiction Morgan Day Frank, 2022-12-10 In *Schools of Fiction*, Morgan Day Frank considers a bizarre but integral feature of the modern educational experience that teachers enthusiastically teach: literary works that have terrible things to say about school. From Ishmael's insistence in Herman Melville's *Moby-Dick* that a whale ship was his Yale College, and my Harvard, to the unnamed narrator's expulsion from his southern college in Ralph Ellison's *Invisible Man*, the most frequently taught books in the English curriculum tend to be those that cast the school as a stultifying and inhumane social institution. Why have educators preferred the anti-scholasticism of the American romance tradition to the didacticism of sentimentalists? Why have they organized African American literature as a discursive category around texts that despaired of the post-Reconstruction institutional system? Why did they start teaching novels that literary form whose very nature, in Mikhail Bakhtin's words, is not canonic? Reading literature in class is a paradoxical undertaking that, according to Day Frank, has proved foundational to the development of American formal

education over the last two centuries allowing the school to claim access to a social world external to itself By drawing attention to the transformative effect literature has had on the school Schools of Fiction challenges some of our core assumptions about the nature of cultural administration and the place of English in the curriculum The educational system Day Frank argues has depended historically on the cultural objects whose existence it is ordinarily thought to govern and the academic subject it is ordinarily thought to have marginalized

The New Abolition Gary Dorrien, 2015-09-29 The black social gospel emerged from the trauma of Reconstruction to ask what a new abolition would require in American society It became an important tradition of religious thought and resistance helping to create an alternative public sphere of excluded voices and providing the intellectual underpinnings of the civil rights movement This tradition has been seriously overlooked despite its immense legacy In this groundbreaking work Gary Dorrien describes the early history of the black social gospel from its nineteenth century founding to its close association in the twentieth century with W E B Du Bois He offers a new perspective on modern Christianity and the civil rights era by delineating the tradition of social justice theology and activism that led to Martin Luther King Jr

Honor Bound David Leverenz, 2012-03-27 As Bill Clinton said in his second inaugural address The divide of race has been America s constant curse In Honor Bound David Leverenz explores the past to the present of that divide He argues that in the United States the rise and decline of white people s racial shaming reflect the rise and decline of white honor White skin and black skin are fictions of honor and shame Americans have lived those fictions for over four hundred years To make his argument Leverenz casts an unusually wide net from ancient and modern cultures of honor to social political and military history to American literature and popular culture

He highlights the convergence of whiteness and honor in the United States from the antebellum period to the present. The Civil War, the civil rights movement, and the election of Barack Obama represent racial progress; the Tea Party movement represents the latest recoil. From exploring African American narratives to examining a 2009 episode of *Hardball* in which two white commentators restore their honor by mocking U.S. Attorney General Eric Holder after he called Americans cowards for not talking more about race, Leverenz illustrates how white honor has prompted racial shaming and humiliation. The United States became a nation state in which light-skinned people declared themselves white. The fear masked by white honor surfaces in such classics of American literature as *The Scarlet Letter* and *Adventures of Huckleberry Finn* and in the U.S. wars against the Barbary pirates from 1783 to 1815 and the Iraqi insurgents from 2003 to the present. John McCain's *Faith of My Fathers* is used to frame the 2008 presidential campaign as white honor's last national stand. *Honor Bound* concludes by probing the endless attempts in 2009 and 2010 to preserve white honor through racial shaming from the birthers and Tea Party protests to Joe Wilson's *You lie* in Congress and the arrest of Henry Louis Gates Jr. at the front door of his own home. Leverenz is optimistic that in the twenty-first century racial shaming is itself becoming shameful.

Nelson Rockefeller's Dilemma Marsha E. Barrett, 2024-08-15

Nelson Rockefeller's Dilemma reveals the fascinating and influential political career of the four-time New York State governor and U.S. vice president. Marsha E. Barrett's portrayal of this multi-faceted political player focuses on the eclipse of moderate Republicanism and the betrayal of deeply held principles for political power. Although never able to win his party's presidential nomination, Rockefeller's tenure as governor was notable for typically liberal policies, infrastructure projects, expanding the state's university system, and investing in local services and the social safety net. As the Civil Rights movement intensified in the early 1960s, Rockefeller envisioned a Republican Party recommitted to its Lincolnian heritage as a defender of Black equality. But the party's extreme right wing, encouraged by its successful outreach to segregationists before and after the nomination of Barry Goldwater, pushed the party to the right. With his national political ambitions fading by the late 1960s, Rockefeller began to tack right himself on social and racial issues, refusing to endorse efforts to address police brutality, accusing without proof Black welfare mothers of cheating the system, or introducing harsh drug laws that disproportionately incarcerated people of color. These betrayals of his own ideals did little to win him the support of the party faithful, and his vice presidency ended in humiliation rather than the validation of moderate ideals. An in-depth, insightful, and timely political history, *Nelson Rockefeller's Dilemma* details how the standard bearer of moderate Republicanism lost the battle for the soul of the Party of Lincoln, leading to the mainlining of white grievance populism for the post-civil rights era.
