An Inside Look at the American Alligator

A Face Only A Mother Could Love

Most alligators are between 8 and 11 feet long and can weigh up to 1,000 pounds! The skin on the back of an alligator is covered in hard plates, called scutes. This creates a skin like armor.

The alligator's head has a long snout and its nostrils are near the top of the snout. This allows the alligator to breathe air, even when it is mostly under the water.

The alligator has four, short legs with five toes on the front legs and four toes on the back legs. Even with short legs, it is fast. The alligator can run up to 11 miles an hour on land!

Here, Fluffy...

Don't feed it your snack. Don't put it on a leash and don't try to take it for a walk. This is definitely not a pet. It is the American Alligator.

It is All About Location

American Alligators can be found throughout the southern part of the United States, including Georgia, Florida, and Louisiana. They are most often found in fresh water. An alligator can be spotted in a slow moving river, lake, marsh, or swamp. Alligators are not usually found in salt water.
