Hans-Jürgen Syberberg, the Film Director as Critical Thinker Xue Lan Rong, Jeremy Hilburn, 2016-12-27 Fourth wave immigration with its vast economic ethnic cultural linguistic and religious diversities have brought new dynamics into the existing social and demographic structures and added both opportunities and challenges to educational systems in North Carolina a Southern U S state with the fastest growing rate of foreign born population in the nation in 1990 2010 and unique geopolitical history This book brings together 17 scholars who have extensive experience working with immigrants in North Carolina and represent a wide range of educational expertise Together their studies illustrate the intersections between historical contexts

geopolitical historical constraints structural factors power policies and laws institutions and organization cultural issues philosophies ideologies identities beliefs values and traditions and immigrant students characteristics on the development of educational practices policies reforms and resistance

Most importantly studying how North Carolina education systems and actors adapt to meet the challenges may offer valuable opportunities for researchers to understand the transformation of educational systems in other new gateway states

Collectively studies in this book deconstruct the framework of the traditional hierarchical assimilation and linguistic policies in recasting the concept of becoming Americans in the New South

The authors utilize frameworks that recognize the structural barriers that disadvantage immigrants in new gateway states but also position youth families and communities as possessing and utilizing valuable resources to promote educational access and achievement

In this sense this book contributes significantly to major contemporary empirical and theoretical debates relating to educating immigrant children

It is our hope that this critical dialogue will continue at a national platform to promote discussion of these timely issues

Enduring Myths That Inhibit School Turnaround Coby V. Meyers, Marlene J. Darwin, 2017-05-01 The concept of school turnaround rapidly improving schools and increasing student achievement outcomes in a short period of time has become politicized despite the relative newness of the idea Unprecedented funding levels for school improvement combined with few examples of schools substantially increasing student achievement outcomes has resulted in doubt about whether or not turnaround is achievable Skeptics have enumerated a number of reasons to abandon school turnaround at this early juncture This book is the first in a new series on school turnaround and reform intended to spur ongoing dialogue among and between researchers policymakers and practitioners on improving the lowest performing schools and the systems in which they operate The turnaround challenge remains salient regardless of what we call it We must improve the nation's lowest performing schools for many moral social and economic reasons In this first book education researchers and scholars have identified a number of myths that have inhibited our ability to successfully turn schools around Our intention is not to suggest that if these myths are addressed school turnaround will always be achieved Business and other literatures outside of education make it clear that turnaround is at best difficult work However for a number of reasons we in education have developed policies and practices that are often antithetical to turnaround Indeed we are making already challenging work harder The myths identified in this book suggest that we still struggle to define or understand what we mean by turnaround or how best or even adequately measure whether it has been achieved Moreover it is clear that there are a number of factors limiting how effectively we structure and support low performing schools both systemically and locally And we have done a rather poor job of effectively leveraging human resources to raise student achievement and improve organizational outcomes We anticipate this book having wide appeal for researchers policymakers and practitioners in consideration of how to support these schools taking into account context root causes of low performance and the complex work to ensure their opportunity to be successful Too frequently we have expected these schools to turn themselves around while failing to assist them with the vision and supports to realize meaningful lasting organizational change The myths identified and debunked in this book potentially illustrate a way forward
