Social Science Record ,1993 **More Like Life Itself** Cory Wright-Maley,2018-10-01

John Dewey wrote in multiple places that education should be an experience of the content and processes of life itself Too often social studies is taught in a way that tells students about real life but fails to engage them in the process of life for which Dewey advocated The core purpose of simulations is to reflect the processes events and phenomena expressed in a variety of real life domains They engage students in these reflections of real life meaningfully as active agents who have the power to make decisions that impact the direction of events and that lead to both intended and unintended consequences Because of the nature of simulations students who participate in them are able to build their capacities to think in complex and critical ways Today despite the growing evidence that simulations have an important role to play in the teaching of social studies they remain an underutilized and undervalued approach to the discipline One of the key obstacles to their widespread adoption is the limited availability of training resources available to social studies teachers Teachers need support to develop a new vision of social studies teaching and learning coupled with practical guidance necessary to implement simulations effectively This volume provides teachers with both When teachers are able to weave simulations effectively into the fabric of social studies teaching and learning they help to promote social studies experiences that are both powerful and purposeful They offer students an experience of the discipline that is indeed More Like Life Itself *Global Studies* John Osborne,Sue Ann Kime,Regina O'Donnell,1992-06 **Assessing with Respect** Starr Sackstein,2021-03-24 In this timely and thoughtful call to action author and educator Starr Sackstein examines the critical intersection between assessment and social and

closing opportunity gaps in student learning The project recognizes schools working to address the needs of all students whether or not those schools have high average test scores This approach thus embraces a shift away from the nation's myopic focus on outcomes This follows from research findings that schools alone cannot fix the problems created by the stark inequalities in our society Instead schools should be expected to do their part by responding to inequities with research based practices With these shifts in mind this book provides case studies of schools that demonstrate key criteria that other schools can emulate such as an inclusive school climate support for language minority students performance based assessment teacher professionalism a commitment to detracking and supports for students in need Book Features Provides accounts of school reform jointly told by researcher practitioner teams connecting current research with successful efforts of educators to create outstanding learning environments Brings together the voices of principals and school leaders who share stories of how their work has unfolded in their school district and state contexts Identifies the school leadership and teacher practices that close opportunity gaps for student learning and what it takes to implement them *Resources in Education*, 1996 *Literature in Language Education* G.
