## Unit 7: Right Triangles & Trigonometry Performance Tasks

*Instructions:* Choose one performance task. Write all your work on a separate clean piece of paper and attach it to this page.

### Big Idea: Measurement

You can use the Pythagorean Theorem or trigonometric ratios to find side lengths or angle measurements of a right triangle.

#### Performance Task 1

The diagram below shows equilateral  $\triangle ABC$  sharing a side with square  $ABDE$ . The square has side lengths of 4. What is  $BE$ ? Justify your answer.

### Big Idea: Similarity

You can use trigonometric ratios to find the lengths of the sides of right triangles.

#### Performance Task 2

A construction crew wants to hoist a heavy beam so that it is standing up straight. They tie a rope to the beam, secure the base, and pull the rope through a pulley to raise one end of the beam from the ground. When the beam makes an angle of  $40^\circ$  with the ground, the top of the beam is 8 ft above the ground.

The construction site has some telephone wires crossing it. The workers are concerned that the beam may hit the wires. When the beam makes an angle of  $60^\circ$  with the ground, the wires are 2 ft above the top of the beam. Will the beam clear the wires on its way to standing up straight? Explain.

Teach Math Like This, Not Like That Matthew L. Beyranevand, 2017-05-24 Teaching mathematics is one of the most difficult and important jobs that anyone can do Mathematics is a critical part of education and an essential building block for problem solving skills that are needed in the real world However many students struggle to learn and understand mathematical concepts and educators need to do everything possible to help our students learn This book focuses on four areas necessary to be an impactful teacher of mathematics Planning Pedagogy Assessment and Relationships For each of the ideas presented in the book a brief introduction will be shared and then two different perspectives will be detailed with examples The first is Not like This which is often the traditional way of teaching mathematics or the less effective approach The second perspective is Teach Like This which is my recommended approach based upon research and my own experience as a teacher math coordinator and graduate instructor of math education Concept-Based Curriculum and Instruction for the Thinking Classroom H. Lynn Erickson, 2007 This indispensable guide combines proven curriculum design with teaching methods that encourage students to learn concepts as well as content and skills for deep understanding across all subject areas **New Syllabus Mathematics Workbook 3** Dr Joseph Yeo, Teh Keng Seng, Loh Cheng Yee, Ivy Chow, 2007-01-01 New Syllabus Mathematics Workbook Express is written in line with the new Singapore Cambridge GCE O Level Examination and the new initiatives of the Ministry of Education The workbook consists of exercises which prepare students for their examinations The more difficult questions are marked with an T to encourage student centred learning the workbook includes

non routine types of worksheets that are classified under the section Alternative Assessment These worksheets encourage students to learn independently through carefully guided steps and the use of IT Students are motivated to investigate mathematical concepts with various methods and think critically so that they will understand and appreciate the concepts better The teacher can gauge the students learning by assessing the work with the scoring rubric found at the end of the relevant worksheets The workbook is accompanied with a CD ROM that contains templates to be used with some worksheets It is hoped that with the use of various pedagogies different types of students will be inspired to achieve success in mathematics
