Mark has been writing about Coy McCubbin's influence on California history, and on history beyond California's borders—most notably in the the subject of this book, the war against and against birds of California, has been Coy's influence on all others. Coy was well prepared to influence his influence during the inception of his history in California in the 1940s and 1950s. While others have seen and seen and had major influence on the situation, Coy has remained dedicated to the study and preservation of these birds well beyond all others. Coy was the star of the founding members of the California Bird Society (CABS), and he has remained a driving force of the Committee on the Birds of the CABS, past and present, steadily dedicated the book to Coy, and with him many more war birds to come.

Historicizing Life-Writing and Egodocuments in Early Modern Europe James R. Farr, Guido Ruggiero, 2022-01-12 This volume historicizes the study of life writing and egodocuments focusing on early modern European reflections on the self self fashioning and identity Life writing and the study of egodocuments currently tend to be viewed as separate fields yet the individual as a purposive social actor provides significant common ground and offers a vehicle both theoretical and practical for a profitable synthesis of the two in a historical context Echoing scholars from a wide range of disciplines who recognize the uncertainty of the nature of the self these essays question the notion of the autonomous self and the attendant idea of continuous identity unfolding in a unified personality Instead they suggest that the early modern self was variable and unstable and can only be grasped by exploring selves situated in specific historical and social cultural contexts and revealed through the wide range of historical documents considered here The three sections of the volume consider first the theoretical contexts of understanding egodocuments in early modern Europe then the practical ways egodocuments from the period may be used for writing life histories today and finally a wider range of historical documents that might be added to

Valencia, 2015-03-05 *Students of Color and the Achievement Gap* is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and

schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks
