An Invitation to Environmental Sociology Michael Mayerfeld Bell, Loka L. Ashwood, Isaac Sohn Leslie, Laura Hanson Schlachter, 2020-09-23

If there were ever a time for environmental sociology it is now As COVID 19 is spreading across our communities our countries our world we have all become too familiar with maintaining that awful term of social distance Yet there can be no true distance from that which is always with us and within us our social ecology An Invitation to Environmental Sociology invites students to delve into this rapidly changing field Written in a lively engaging style the authors cover a broad range of topics in environmental sociology with a personal passion rarely seen in sociology texts The book's unique organization explores three different kinds of questions about interactions between humans and the natural world the material the ideal and the practical The Sixth Edition of this bestseller comprises 12 chapters instead of 13 making it easier to fit into the normal rhythm of a course But the result is also an edition that is up to date and enriched with much newer material while continuing to use an inviting tone that the title promises Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides

Towards an embodied science of intersubjectivity: Widening the scope of social understanding research Ezequiel Di

Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people's intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition

narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of dis connection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory

The Political Ecology of Informal Waste Recyclers in India Federico Demaria, 2023-06-26 Waste is increasingly a site of social conflict The questions related to waste management are not merely technical what how where and by whom become intrinsically political questions This book is about the power relations in recycling from the viewpoint of political ecology and ecological economics Informal waste recyclers are invisible for citizens and public policy This book focuses on environmental conflicts involving them with two emblematic case studies from India Firstly ship breaking where the metabolism of a global infrastructure namely shipping shifts social and environmental costs to very localized communities in order to obtain large profits Secondly the conflict around municipal solid waste management in Delhi shows how environmental costs are shifted to urban residents and recyclers are dispossessed of their livelihood source recyclable waste The first is an example of capital accumulation by contamination while the second involves both dispossession and contamination The struggles of informal recyclers constitute an attempt to re politicize waste metabolism beyond techno managerial solutions by fostering counter hegemonic discourses and praxis The book presents a range of experiences mostly in India but with examples from all over the world to inform theory on how environments are shaped politicized and contested
