Goodwin, 2020-02-27 Some people fear and mistrust numbers Others want to use them for everything After a long career as a statistician Paul Goodwin has learned the hard way that the ones who want to use them for everything are a very good reason for the rest of us to fear and mistrust them **Something Doesn't Add Up** is a fieldguide to the numbers that rule our world even though they don't make sense Wry witty and humane Goodwin explains mathematical subtleties so painlessly that you hardly need to think about numbers at all He demonstrates how statistics that are meant to make life simpler often make it simpler than it actually is but also reveals some of the ways we really can use maths to make better decisions Enter the world of fitness tracking the history of IQ testing China's social credit system Effective Altruism and learn how someone should have noticed that Harold Shipman was killing his patients years before they actually did In the right hands maths is a useful tool It's just a pity there are so many of the wrong hands about Metadata and Semantics Research Sissi Closs, Rudi

Quantum Economics David Orrell,2018-07-05 A decade after the financial crisis there is a growing consensus that economics has failed and needs to go back to the drawing board David Orrell argues that it has been trying to solve the wrong problem all along Economics sees itself as the science of scarcity Instead it should be the science of money which plays a surprisingly small role in mainstream theory And money is a substance that turns out to have a quantum nature of its own Just as physicists learn about matter by studying the exchange of particles at the subatomic level so economics should begin by analysing the nature of money based transactions Quantum Economics therefore starts with the meaning of the phrase how much or to use the Latin word quantum From quantum physics to the dualistic properties of money via the emerging areas of quantum finance and quantum cognition this profoundly important book reveals that quantum economics is to neoclassical economics what quantum physics is to classical physics a genuine turning point in our understanding
