Leporcher, Ching-Hwa Eu, 2014-10-20 This book is a guide to asset and risk management from a practical point of view. It is centered around two questions triggered by the global events on the stock markets since the middle of the last decade: Why do crashes happen when in theory they should not? How do investors deal with such crises in terms of their risk measurement and management and as a consequence what are the implications for the chosen investment strategies? The book presents and discusses two different approaches to finance and investing: i.e. modern portfolio theory and behavioral finance and provides an overview of stock market anomalies and historical crashes. It is intended to serve as a comprehensive introduction to asset and risk management for bachelor's and master's students in this field as well as for young professionals in the asset management industry. A key part of this book is the exercises to further demonstrate the concepts presented with examples and a step by step business case. An Excel file with the calculations and solutions for all 17

examples as well as all business case calculations can be downloaded at extras.springer.com Basic Economic Principles

Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspee, Luc Taerwe, Dan Frangopol, 2018-10-31

This volume contains the papers presented at IALCCE2018 the Sixth International Symposium on Life Cycle Civil Engineering. IALCCE2018 held in Ghent, Belgium, October 28-31, 2018. It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R. Khan lecture, 8 keynote lectures and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance or optimization in the framework of life cycle analysis of civil engineering structures and infrastructure systems. Life cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness and resilience. Applications relate to buildings, bridges and viaducts, highways and runways, tunnels and underground structures, off shore and marine structures, dams and hydraulic structures, prefabricated design infrastructure systems, etc. During the IALCCE2018 conference, a particular focus is put on the cross fertilization between different sub areas of expertise and the development of an overall vision for life cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision makers and representatives from local authorities.
