A History of the Book in America Robert A. Gross, Mary Kelley, 2010-07-15 Volume Two of A History of the Book in America documents the development of a distinctive culture of print in the new American republic Between 1790 and 1840 printing and publishing expanded and literate publics provided a ready market for novels almanacs newspapers tracts and periodicals Government business and reform drove the dissemination of print Through laws and subsidies state and federal authorities promoted an informed citizenry Entrepreneurs responded to rising demand by investing in new technologies and altering the conduct of publishing Voluntary societies launched libraries lyceums and

schools and relied on print to spread religion redeem morals and advance benevolent goals Out of all this ferment emerged new and diverse communities of citizens linked together in a decentralized print culture where citizenship meant literacy and print meant power Yet in a diverse and far flung nation regional differences persisted and older forms of oral and handwritten communication offered alternatives to print The early republic was a world of mixed media Contributors Elizabeth Barnes College of William and Mary Georgia B Barnhill American Antiquarian Society John L Brooke The Ohio State University Dona Brown University of Vermont Richard D Brown University of Connecticut Kenneth E Carpenter Harvard University Libraries Scott E Casper University of Nevada Reno Mary Kupiec Cayton Miami University Joanne Dobson Brewster New York James N Green Library Company of Philadelphia Dean Grodzins Massachusetts Historical Society Robert A Gross University of Connecticut Grey Gundaker College of William and Mary Leon Jackson University of South Carolina Richard R John Columbia University Mary Kelley University of Michigan Jack Larkin Clark University David Leverenz University of Florida Meredith L McGill Rutgers University Charles Monaghan Charlottesville Virginia E Jennifer Monaghan Brooklyn College of The City University of New York Gerald F Moran University of Michigan Dearborn Karen Nipps Harvard University David Paul Nord Indiana University Barry O Connell Amherst College Jeffrey L Pasley University of Missouri Columbia William S Pretzer Central Michigan University A Gregg Roeber Pennsylvania State University David S Shields University of South Carolina Andie Tucher Columbia University Maris A Vinovskis University of Michigan Sandra A Zagarell Oberlin College

John Ewing, 1996-09-05 This is the story of American mathematics during the past century. It contains articles and excerpts from a century of the American Mathematical Monthly giving the reader an opportunity to skim all one hundred volumes of this popular mathematics magazine without actually opening them. It samples mathematics year by year and decade by decade. The reader can glimpse the mathematical community at the turn of the century, the controversy about Einstein and relativity, the debates about formalism in logic, the immigration of mathematicians from Europe and the frantic effort to organize as the war began. More recent articles deal with the advent of computers and the changes they brought and with some of the triumphs of modern research. *Applied Mechanics Reviews*, 1974
