Rover 25 Cars For User Guide:

The Closure of MG Rover Great Britain: National Audit Office, 2006-03-10 MG Rover went into administration in April 2005 when its proposed deal with a Chinese company SAIC collapsed and it did not have sufficient cash to continue trading. The subsequent closure of MG Rover's plant at Longbridge in the West Midlands resulted in the direct loss of almost 6 000 jobs and with potentially serious consequences for the local economy. This NAO report examines the support provided to MG Rover by the DTI and other public bodies before and during the Company's collapse in 2005 and on the effectiveness of plans to deal with and mitigate the consequences of the firm's closure. Amongst the conclusions drawn the report identifies weaknesses in the DTI's contingency planning and questions the cost effectiveness of the DTI's loan of 6.5 million designed to sustain the business for a week while the administrators sought to sell the Company as a going concern. The report goes on to make a number of recommendations to improve future decision making, contingency planning and the delivery of training and support in the event of a large scale company failure.

Driving the Dragon Mark Andrews, 2025-04-15 China is now at the forefront of electric vehicle adoption and a wave of Chinese manufactured cars is now hitting Europe and the West. As the world's largest car producer since 2008, China's automotive industry deserves a closer look. *Driving the Dragon* explores the history of Chinese car manufacture, looking at some of the important cars on that journey, the false starts and missed opportunities. The story begins with the Rover 75 and how it played a key role in moving the Chinese car industry forward. It concludes with a look at cars from the likes of BYD, Zeekr and Nio, which are becoming mainstream in the UK and Europe as some of the most competitive electric vehicles on the market, not just in terms of price but also performance and desirability. For many people, China is still a very enigmatic country, not helped by recent political events. While the book focuses on the automotive industry, it also looks at the country itself and examines the culture surrounding the industry. The author spent 30 years in China, teaching test driving and reviewing Chinese cars and writing while witnessing first hand the extraordinary growth of the Chinese car industry.

Contemporary Ergonomics 2006 Philip D. Bust, 2020-07-24 Presenting the proceedings of the Ergonomics Society's annual conference, the series embraces the wide range of topics covered by ergonomics. Individual papers provide insight into current practice, present new research findings and form an invaluable reference source. A wide range of topics are covered in these proceedings, including Ergonomics, Human Factors and User Centred Design. It also features related disciplines such as Psychology, Engineering and Physiology. Particular emphasis is given to the utility of these disciplines in improving health, safety, efficiency and productivity. The 2006 Annual Conference features four special sessions on Usability of Homes, Human Computer Interaction, Human Factors in the Oil Gas and Chemical Industries and Control Room Design: Current and Future Challenges. As well as being of interest to mainstream ergonomists and human factors specialists, *Contemporary Ergonomics* will appeal to all those who are concerned with the interaction of people with their working and leisure environment, including designers, manufacturing and production.
