Military Strategy Versus Diplomacy in Bismarck's Time and Afterwards Munroe Smith,1915 **A Revolution in Favor of Government** Max M. Edling,2008-07-08 What were the intentions of the Founders Was the American constitution designed to protect individual rights To limit the powers of government To curb the excesses of democracy Or to create a robust democratic nation state These questions echo through today's most heated legal and political debates In this powerful new interpretation of America's origins Max Edling argues that the Federalists were primarily concerned with building a government that could act vigorously in defense of American interests The Constitution transferred the powers of war making and resource extraction from the states to the national government thereby creating a nation state invested with all the important powers of Europe's eighteenth century fiscal military states A strong centralized government however challenged the American people's deeply ingrained distrust of unduly concentrated authority To secure the Constitution's adoption the Federalists had to accommodate the formation of a powerful national government to the strong current of anti statism in the American political tradition They did so by designing a government that would be powerful in times of crisis but which would make only limited demands on the citizenry and have a sharply restricted presence in society The Constitution promised the American people the benefit of government without its costs Taking advantage of a newly published letterpress edition of the constitutional debates *A Revolution in Favor of Government* recovers a neglected strand of the Federalist argument making a persuasive case for rethinking the formation of the federal American state *The Diplomatic Review* ,1863 **Japanese Foreign Policy Today** NA NA,2016-04-30 The US remains the leading world power but across the Pacific Japan has the world's second largest economy and great international economic clout Some voices in the international arena have urged Japan to play more constructive and politically active roles in the international arena This volume collects essays analyzing the key issues in Japan's international relations as it heads toward a new world order the pressing global and regional issues and their
