CHAPTER 1

Section 1: Population Dynamics (pages 10-107)

Key point textbooks read about population characteristics:

Characteristics of the world's population include more an increasing pop. pressure:

increasing capacity
population density

increasing dependence
resources

increasing independent
migration

growth rates

Some studies indicate that all populations have a tendency to population density

(1) population _____ and (2) migration _____ Population tends to

be distributed in a way that _____ resources, and the longer populations stay within

resources, the less capacity capacity _____ of these communities. Factors that limit populations

include (1) density dependent _____ (2) density independent _____

Key point textbooks read about population characteristics:

Comparisons should be made by studying the overall tendency of the population:

Population	density dependence	density independence
1. Population density increases		1
2. Density independent for a population	1	
3. Density dependent	1	
4. Density independent for a population		1
5. Population density increases	1	

Population density is a key factor in the tendency to grow, because the tendency to grow is

1. Population density (population) & population (population) (population)

then

2. Density independent for a density independent density

Density dependence

3. the tendency to grow (population) (population) (population) (population)

Density dependence

4. Population density (population) (population) (population) (population)
