Encyclopedia of White-Collar and Corporate Crime Lawrence M. Salinger, 2013-06-14 Since the first edition of the Encyclopedia of White Collar and Corporate Crime was produced in 2004 the number and severity of these crimes have risen to the level of calamity so much so that many experts attribute the near Depression of 2008 to white collar malfeasance namely crimes of greed and excess by bankers and financial institutions Whether the perpetrators were prosecuted or not white collar and corporate crime came near to collapsing the U S economy In the 7 years since the first edition was produced we have also seen the largest Ponzi scheme in history Maddoff an ecological disaster caused by British Petroleum and its subcontractors Gulf Oil Spill and U S Defense Department contractors operating like vigilantes in Iraq Blackwater White collar criminals have been busy and the Second Edition of this encyclopedia captures what has been going on in the news and behind the scenes with new articles and updates to past articles

Commercial Law Aspects of Residential Mortgage Securitisation in Australia Pelma Rajapakse, Shanuka Senarath, 2019-04-11 This book evaluates key commercial law aspects of the relevant law and legislation governing residential mortgage backed securities RMBSs in Australia from a legal perspective Within the context of a public benefit test framework the book seeks to critically evaluate the impact and effectiveness of current law and regulation governing RMBSs There is a dearth of both academic and practical literature on the legal and regulatory issues surrounding RMBSs in Australia The book aims to make a contribution to the formulation of law and public policy by suggesting a number of reforms to the current law and practice surrounding RMBSs in Australia In part these suggested reforms will be based on the lessons learned from the experiences of overseas jurisdictions such as Canada the U K and the United States

True Sale Securitization in Germany and China Shengzhe Wang, 2005-05-02 Inhaltsangabe Abstract The Master thesis for LL M at Goethe university s ILF titled True Sale Securitization in Germany and China is a comparative study about true sale securitization The initial reason for a comparative study was the similarity of banking centred financial systems in these two countries Another reason is connected with the True Sale Initiative TSI a plan composed by major German banks aiming at improving their financial situation German banks start to be plagued by the non performing loans NPLs since 2001 due to mediocre performance of German corporations and depreciation of banks investment to the east part during 1990s Facing the competitions from other countries and under pressures from the International Convergence of Capital Measurement and Capital Standards a Revised Framework Basel II issued by the Basel Committee on Banking and Supervisory Practice Basel Committee at the Bank for International Settlements the German banks employed the TSI as one part of the bigger financial reform to regain competition in Europe and worldwide December 2004 the first true sale securitization was successfully constructed in Germany after German federal government changed some of its formerly unfriendly legal taxation and accounting rules The German experiences with TSI can shed some light

into how China to develop its asset backed securities ABS market in order to save its heavy NPLs burdened banks and find alternative funds for its corporations Although securitization might be a possible solution the Chinese current legal system and market infrastructure prevents it from fully utilizing this modern financing technique What China can learn from Germany s experiences is that a special securitization law is preferred to amending each relevant laws and rules in order to get rid of legal barriers and contradictions for true sale securitizations In addition strong governmental supports will facilitate and accelerate the process of true sale securitization market development The similarities between the German and Chinese financial system is the main incentive for this study Both Germany and China have a financial system that is dominated by banks and at the same time features a weak capital market Banks are the main external financing sources for domestic corporations Furthermore in both countries banks are suffering losses and carrying burden of non performing loans NPLs due to the bad

Research Handbook on International Financial Regulation Kern Alexander,Rahul Dhumale,2012 The globalisation of financial markets has attracted much academic and policymaking commentary in recent years especially with the growing number of banking and financial crises and the current credit crisis that has threatened the stability of the global financial system This major new Research Handbook sets out to address some of the fundamental issues in financial regulation from a comparative and international perspective and to identify some of the main research themes and approaches that combine economic legal and institutional analysis of financial markets Specially commissioned contributions represent diverse viewpoints on the financial regulation debate and cover a number of new and controversial topics not yet adequately addressed in the literature Specifically these include financial innovation particularly in the context of the credit risk transfer market securitization and the systemic importance of the over the counter trading markets the institutional structure of international financial regulation and risk management and corporate governance of financial institutions This Handbook will provide a unique and fully up to date resource for all those with an interest in this critical issue including academic researchers in finance and regulation practitioners working in the industry and those involved with regulation and policy

Consumer Credit, Debt and Bankruptcy Johanna Niemi,Iain Ramsay,William C. Whitford,2009-07-15 After a long period of prosperity and steady economic growth the world s leading economies are now in crisis and although there will be debate about its origins the scale and seriousness of the crisis is in no doubt There is also no doubt that excessive amounts of consumer credit allied to a weak understanding of how globalised credit markets might react to a crisis have played a significant part This book which is primarily about credit debt and the trouble they have led to is written by authors who have specialised in researching into over indebtedness that is situations in which an individual s debt burden has become overwhelming For these authors the plight of individuals is a primary concern but the wider issue is how credit is used and how it changes societies The essays in this volume addressing topics which are fundamental to our understanding of the current crisis range widely across the whole sector of consumer finance including mortgages credit binges the

regulation of consumer lending insolvency repayment plans debt counselling and much more besides The conclusions drawn from the book are equally wide ranging but above all the lesson learned from these essays is that the financialisation of contemporary life ensures that issues of the appropriate role of credit remain of critical importance in society *Rights in Context* Reza Banakar, 2016-03-23 This volume offers snapshots of how rights are debated and employed in public discourse to reshape legal and political relations at the beginning of the twenty first century It explores how rights are used to challenge the state of affairs by individuals and groups who seek justice and the strategies devised to defy the existing rights by those who wish to recast the social and political order This volume discusses rights firstly in relation to actual events and issues faced by policy makers courts international agencies or ordinary people These range from the demands of minority groups living in the West to freely practice their culture and or religion to the threat of terrorism the regulation of asylum rights the investor s rights to disclosure and the rights of artists to freedom of expression Secondly rights discourse is examined in relation to attempts to redefine the form and content of rights for example by banning the right to wear religious symbols in public institutions or detaining terrorism suspects without trial Thirdly rights discourse is explored in connection with the attempts to develop new notions of rights such as human security which can more effectively respond to the challenges of late modern societies Finally the statuses of rights in sociological theory and socio legal research are briefly discussed and analysed **Life Settlements and Longevity Structures** Geoff Chaplin, Jim Aspinwall, Mark

Venn, 2009-08-03 Recent turbulence in the financial markets has highlighted the need for diversified portfolios with lower correlations between the different investments Life settlements meet this need offering investors the prospect of high stable returns uncorrelated with the broader financial markets This book provides readers of all levels of experience with essential information on the process surrounding the acquisition and management of a portfolio of life settlements the assessment modelling and mitigation of the associated longevity interest rate and credit risks and practical approaches to financing and risk management structures It begins with the history of life insurance and looks at how the need for new financing sources has led to the growth of the life settlements market in the United States The authors provide a detailed exploration of the mathematical formulae surrounding the generation of mortality curves drawing a parallel between the tools deployed in the credit derivatives market and those available to model longevity risk Structured products and securitisation techniques are introduced and explained starting with simple vanilla products and models before illustrating some of the investment structures associated with life settlements Capital market mechanisms available to assist the investor in limiting the risks associated with life settlement portfolios are outlined as are opportunities to use life settlement portfolios to mitigate the risks of traditional capital markets The last section of the book covers derivative products either available now or under consideration that will reduce or potentially eliminate longevity risks within life settlement portfolios It then reviews hedging and risk management strategies and considers how to measure the effectiveness of risk mitigation **Investment Banking**

Challenging the Innovation Paradigm Karl Erik Sveiby, Pernilla Gripenberg, Beata Segercrantz, 2012 Innovation is almost always seen as a good thing Challenging the Innovation Paradigm is a critical analysis of the innovation frenzy and contemporary innovation research The one sided focus on desirable effects of innovation misses many opportunities to reduce the undesirable consequences Authors in this book show how systemic effects outside the innovating firms reduce the net benefits of innovation for individual employees customers as well as for society as a whole also the innovators own organizations This book analyzes the dominant discourses that construct and reconstruct the assumptions and one sidedness of contemporary innovation research generally known as the pro innovation bias by focusing on consequences of innovation distinguishing between intended and unintended as well as desirable and undesirable consequences Contributors illustrate how both the discourses of innovation and the consequences of innovation permeate all levels of society in policy discourse in academic discourse in research funding in national innovation systems in the financial sector in organizational and work contexts and in environmental pollution The volume offers a critical multidisciplinary and multinational perspective on the topic with authors from diverse academic fields examining and making comparisons
