Human Interaction, Emerging Technologies

and Future Systems V Tareq Ahram, Redha Taiar, 2021-09-09 This book reports on research and developments in human technology interaction. A special emphasis is given to human computer interaction and its implementation for a wide range of purposes such as health care, aerospace, telecommunication and education among others. The human aspects are analyzed in detail. Timely studies on human centered design, wearable technologies, social and affective computing, augmented virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business security and infrastructure are also critically examined, thus offering a timely scientifically grounded but also professionally oriented snapshot of the current state of the field. The book gathers contributions presented at the 5th International Conference on Human Interaction and Emerging Technologies (IHIET 2021) August 27-29, 2021 and the 6th International Conference on Human Interaction and Emerging Technologies Future Systems (IHIET FS 2021) October 28-30, 2021, held virtually from France. It offers a timely survey and a practice oriented reference guide to researchers and professionals dealing with design systems, engineering and management of the next generation technology and service systems.
