Capturing the Light Roger Watson, Helen Rappaport, 2024-05-01 A thoroughly enjoyable account of the English scientist and the French artist each toiling alone who invented modern photography The Wall Street Journal During the 1830s in an atmosphere of intense scientific inquiry fostered by the industrial revolution two quite different men one in France one in England developed their own dramatically different photographic processes in total ignorance of each other's work These two lone geniuses Henry Fox Talbot in the seclusion of his English country estate at Lacock Abbey and Louis Daguerre in the heart of post revolutionary Paris through diligence disappointment and sheer hard work overcame

extraordinary odds to achieve the one thing man had for centuries been trying to do to solve the ancient puzzle of how to capture the light and in so doing make nature paint its own portrait With the creation of their two radically different processes the Daguerreotype and the Talbotype these two giants of early photography changed the world and how we see it Drawing on a wide range of original contemporary sources and featuring plates in color sepia and black and white many of them rare or previously unseen Capturing the Light charts an extraordinary tale of genius rivalry and human resourcefulness in the quest to produce the world's first photograph Energetically written and deftly paced gripping popular history Publishers Weekly

American Exposures Louis Kaplan, 2005 American Exposures sheds light on photographs from Arthur Mole's propagandistic living photographs of American icons and symbols to the exploration of contemporary subcultural communities by the Korean born photographer and performance artist Nikki Lee and asserts that the depiction of community is a central component to photography Louis Kaplan deploys a number of critical concepts and theories developed by Jean Luc Nancy in *The Inoperative Community* as well as other philosophers and applies them to the field of photography studies With an original approach to photography from Edward Steichen's *Family of Man* exhibition to Pedro Meyer and the rise of the digital image Kaplan points to a new way to think about the intimate relationship among photography American life and the artistic imagination Back cover

A Culture of Improvement Robert Friedel,2010-02-26 How technological change in the West has been driven by the pursuit of improvement a history of technology from plows and printing presses to penicillin the atomic bomb and the computer Why does technology change over time how does it change and what difference does it make In this sweeping ambitious look at a thousand years of Western experience Robert Friedel argues that technological change comes largely through the pursuit of improvement the deep rooted belief that things could be done in a better way What Friedel calls the culture of improvement is manifested every day in the ways people carry out their tasks in life from tilling fields and raising children to waging war Improvements can be ephemeral or lasting and one person s improvement may not always be viewed as such by others Friedel stresses the social processes by which we define what improvements are and decide which improvements will last and which will not These processes he emphasizes have created both winners and losers in history Friedel presents a series of narratives of Western technology that begin in the eleventh century and stretch into the twenty first Familiar figures from the history of invention are joined by others the Italian preacher who described the first eyeglasses the dairywomen displaced from their control over cheesemaking and the little known engineer who first suggested a grand tower to Gustav Eiffel Friedel traces technology from the plow and the printing press to the internal combustion engine the transistor and the space shuttle Friedel also reminds us that faith in improvement can sometimes have horrific consequences as improved weaponry makes warfare ever more deadly and the drive for improving human beings can lead to eugenics and even genocide The most comprehensive attempt to tell the story of Western technology in many years engagingly written and lavishly illustrated *A Culture of Improvement* documents the ways in which the drive for improvement has shaped our modern world
