Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators.

Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn Gonsalves, Chahna, Pearson, Jayne, 2023-08-14 Assessment by rubrics has emerged as a tool with great potential to guide successful student learning from a competency-based approach. Rubrics as instruments that make it possible to share the criteria for carrying out learning and assessment tasks with students are excellent roadmaps for student learning largely because they allow students to know what they are expected to do and what they are expected to achieve by carrying out the learning tasks. *Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn* contributes to the improvement of what is being evaluated by identifying the strengths as well as the weaknesses of the didactic use of rubrics in the assessment of university learning. The book also provides a set of theoretical issues, methodological elements, and practical resources for the assessment of university learning using rubrics. Covering topics such as active learning, self-assessment, and teacher identity, this reference work is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, educators, and students.

Gomez,Alicia Grunow,Paul G. LeMahieu,2015-03-01 As a field education has largely failed to learn from experience Time after time promising education reforms fall short of their goals and are abandoned as other promising ideas take their place In Learning to Improve the authors argue for a new approach Rather than implementing fast and learning slow they believe educators should adopt a more rigorous approach to improvement that allows the field to learn fast to implement well Using ideas borrowed from improvement science the authors show how a process of disciplined inquiry can be combined with the use of networks to identify adapt and successfully scale up promising interventions in education Organized around six core principles the book shows how networked improvement communities can bring together researchers and practitioners to accelerate learning in key areas of education Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers Learning to Improve offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation s schools and colleges High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations

Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimaged to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark
