10. **Nonlinear Regression** is a regression model where the relationship between the independent variable and the dependent variable is nonlinear. It is used when the data points do not follow a straight line. Examples of nonlinear regression include logistic regression, polynomial regression, and neural networks.
11. **Logistic Regression** is a type of nonlinear regression used for binary classification. It models the probability of a binary outcome (e.g., success/failure) based on a set of input features. The output is a probability between 0 and 1, which can be converted into a binary class.
12. **Polynomial Regression** is a type of nonlinear regression where the relationship between the independent variable and the dependent variable is modeled as a polynomial function. It is used when the data points follow a curved pattern. Examples of polynomial regression include quadratic regression and cubic regression.
13. **Neural Networks** are a type of nonlinear regression model that can learn complex, non-linear relationships between input and output variables. They are composed of multiple layers of nodes, each representing a different feature or interaction between features. Neural networks are used in a wide range of applications, including image recognition, natural language processing, and recommendation systems.
14. **Support Vector Machines (SVM)** are a type of nonlinear regression model that can handle both linear and nonlinear data. They work by finding the optimal decision boundary (hyperplane) that separates the data points into two classes. SVMs are used in a variety of applications, including image classification, text classification, and financial forecasting.
15. **Decision Trees** are a type of nonlinear regression model that can handle both linear and nonlinear data. They work by splitting the data into subsets based on a series of binary decisions (e.g., "if x is greater than y, then go to node A"). Decision trees are used in a wide range of applications, including classification, regression, and feature selection.
