Prelude To Everest:

Prelude to Everest Ian R Mitchell, George Rodway, 2014-11-26 Acclaimed hillwalking writers Ian R Mitchell and George Rodway tell the fascinating story of Aberdeen born Alexander Kellas and his contribution to mountaineering from the 20th century to the present day Now a largely neglected figure Kellas is the pioneer of high altitude physiology his climbing routes still in evidence today Follow Kellas journey which takes him from the Scottish Cairngorms to the Himalaya and discover how his struggles and explorations have impacted upon mountaineering today **Everest & Conquest in the Himalaya**

Richard Sale, George Rodway, 2011-07-12 A history of those who have scaled Mount Everest and the advances in mountaineering over a century At one time the summits of the world s highest peaks Everest included were beyond reach Pioneering attempts to overcome the dangers of climbing at extremely high altitudes ended in failure sometimes with disastrous consequences Yet today high altitude ascents are frequent almost commonplace Everest can be conquered by relatively inexperienced mountaineers and their exploits barely merit media attention unless they go fatally wrong This dramatic history of Everest climbs describes in vivid detail the struggle to conquer the mountain and the advances in scientific knowledge that made the conquest possible It also offers compelling insight into the science of mountaineering as well as the physical and psychological challenges faced by individuals who choose to test themselves in some of the harshest conditions on earth *Higher and Colder* Vanessa Heggie, 2019-08-02 During the long twentieth century explorers went in unprecedented numbers to the hottest coldest and highest points on the globe Taking us from the Himalaya to Antarctica and beyond *Higher and Colder* presents the first history of extreme physiology the study of the human body at its physical limits Each chapter explores a seminal question in the history of science while also showing how the apparently exotic locations and experiments contributed to broader political and social shifts in twentieth century scientific thinking Unlike most books on modern biomedicine *Higher and Colder* focuses on fieldwork expeditions and exploration and in doing so provides a welcome alternative to laboratory dominated accounts of the history of modern life sciences Though centered on male dominated practices science and exploration it recovers the stories of women s contributions that were sometimes accidentally and sometimes deliberately erased Engaging and provocative this book is a history of the scientists and physiologists who face challenges that are physically demanding frequently dangerous and sometimes fatal in the interest of advancing modern science and pushing the boundaries of human ability **Headstrap** Nandini Purandare, Deepa
