 interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching
 Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and
 selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more
 than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows
 on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to
 hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the
 new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and
 Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units
 and science activity books Each annotation of curriculum material includes a recommended grade level a description of the

activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

Earth, Moon, and Planets Fred Lawrence Whipple, 1968 The increase in our knowledge of the solar system during the five years since the author last revised this book 1963 greatly exceeds that in the previous two decades The program of the U S National Aeronautics and Space Administration and the space program of the U S S R have been prime contributors to this rapid progress but the impetus has carried over to groundbased studies of the Moon and planets as well The advances in radio and radar astronomy alone are striking and are continuing at an accelerating pace This third edition of Mr Whipple s popular and authoritative book is thoroughly revised in light of this new knowledge The most extensive revisions are in the chapters on the Moon Mars and Venus the members of the solar system on which the various space programs have concentrated The author has included many new and dramatic illustrations in this third edition among them photographs taken from U S and Russian space craft There are striking photographs of the Moon with close up views of its surface texture pictures of Mars taken from Mariner IV and radar pictures of Venus that see through that planet s obscuring cloud layer The book is written in nontechnical language and with a lucid witty style that is readily understandable to the interested layman Mathematics has been avoided and scientific methods and processes are described in simple terms In presenting the latest information about the planets and their moons Mr Whipple discusses their origin and evolution motions atmospheres temperatures surface conditions the environment essential for life as we know it and the possibilities of life outside the Earth He concludes with a discussion of current theories about the origin of the solar system
