The Method of Socratic Proofs Dorota Leszczyńska-Jasion, 2025-06-13 This book contains a systematic and formal attempt to model solutions to problems such as: Is it possible to prove a question? Is it possible to prove something by the use of questions? Do the existing paradigms in the logic of questions allow one to combine questions and proofs? What are the results in this field? In developing answers, the book focuses on the applications of the method of Socratic proofs and goes beyond that. It starts out with an overview of the leading paradigms, issues, problems, and ready solutions in the logic of questions and places Inferential Erotetic Logic and the method of Socratic proofs against a wider background. It then introduces these two methods in more detail and explains how they can be used for classical logic, intuitionistic propositional logic, and for basic modal logics. Next, the book deals with issues specific to the field of the logic of questions, introducing the tools of Minimal Erotetic Semantics (MiES). The final chapters describe the translations between proof systems from a Socratic transformation derived in an erotetic calculus into a sequent system.

Applied Calculus for Business, Economics, and the Social and Life Sciences Laurence D. Hoffmann, Gerald L. Bradley, Kenneth H. Rosen, 2005 The Expanded Eighth Edition of *Applied Calculus for Business, Economics, and the Social and Life Sciences* includes four additional chapters: Chapter 8 Differential Equations, Chapter 9 Infinite Series and Taylor Approximations, Chapter 10 Probability and Calculus, and Chapter 11 Trigonometric Functions. The textbook meets the needs of instructors who cover topics in one or more of these four chapters together with material from the initial seven chapters. This is often a two-semester course. The word *Applied* in this title distinguishes this volume from the shorter edition. The book introduces calculus in real-world contexts; the primary goal is to provide a sound intuitive understanding of basic concepts students need as they pursue careers in business, the life sciences, and the social sciences.
