China's Rise in the World ICT Industry Lutao Ning, 2009-06-04 One of the most striking phenomena of China's remarkable economic growth is that its huge volume of exports are becoming high tech China is now the world's largest Information and Communication Technology ICT exporter having overtaken Japan and the European Union in 2003 and the United States in 2004 China's ICT industry is also the largest manufacturing sector within the Chinese economy This book

examines how China has attained this leading position and presents one of the first accounts of China's ICT development model with specific reference to the experiences of East Asian tigers. It shows how the development of the industry was military driven before 1978 and how subsequently Chinese policymakers struggling with domestic market reform and challenged by trade liberalisation and globalisation managed to push through ICT development strategies. Overall it discusses the debates between policymakers as to the most appropriate economic development strategy for catching up and demonstrates how China moved away from the across the board protectionist and interventionist industrial policies pursued by many developing countries but has not wholeheartedly followed the neo liberal free trade and market policies favoured by the World Bank, WTO and IMF. By doing so it sheds light on the limitations of China's strategies moving forward and identifies policy lessons for other developing countries.

Reforming European Welfare States Jochen Clasen, 2005-08-25. This is the first in depth comparison of the UK and Germany as two large but highly distinct European welfare states. This analysis provides a systematic comparison of policy change across each country in three core areas: unemployment support, pensions and family policy.

Reforming Antitrust Alan J. Devlin, 2021-08-19. Industrial consolidation, digital platforms and changing political views have spurred debate about the interplay between public and private power in the United States and have created a bipartisan appetite for potential antitrust reform that would mark the most profound shift in US competition policy in the past half century. While neo Brandeisians call for a reawakening of antitrust in the form of a return to structuralism and a concomitant rejection of economic analysis founded on competitive effects, proponents of the status quo look on this state of affairs with alarm. Scrutinizing the latest evidence, Alan J. Devlin finds a middle ground. US antitrust laws warrant revision, he argues, but with far more nuance than current debates suggest. He offers a new vision of antitrust reform achieved by refining our enforcement policies and jettisoning an unwarranted obsession with minimizing errors of economic analysis.

The Imperative of Development Geoffrey Gertz, Homi Kharas, Johannes F. Linn, 2017-09-12. The achievements and legacy of the Wolfensohn Center for Development at Brookings. The Imperative of Development highlights the research and policy analysis produced by the Wolfensohn Center for Development at Brookings. The Center, which operated from 2006 to 2011, was the first home at Brookings for research on international development. It sought to help identify effective solutions to key development challenges in order to create a more prosperous and stable world. Founded by James and Elaine Wolfensohn, the Center's mission was to create knowledge that leads to action with real, scaled up and lasting development impact. This volume reviews the Center's achievements and lasting legacy, combining highlights of its most important research with new essays that examine the context and impact of that research. Six primary research streams of the Wolfensohn Center's work are highlighted in The Imperative of Development: the shifting structure of the world economy in the twenty-first century, the challenge of scaling up the impact of development interventions, the effectiveness of development assistance, how to promote economic and social inclusion for Middle Eastern youth, the case for investing in early child development and the need for

global governance reform In each chapter a scholar associated with the particular research topic provides an overview of the issue and its broader context then describes the Center's work on the topic and the subsequent influence and impact of these efforts The Imperative of Development chronicles the growth and expansion of the first center for development research in Brookings's 100 year history and traces how the seeds of this initiative continue to bear fruit The Rules of the Game Ronald I.
