**Unification of Classical, Quantum, and Relativistic Mechanics and of the Four Forces** J. X. Zheng-Johansson,P.-I. Johansson,2006 In this book Drs J X Zheng Johansson and Per Ivar Johansson present a remarkable unification scheme The scheme is based on an analysis of the overall experimental observations available up to today and an observation of the unsolved problems maintained in contemporary theoretical physics revisiting past controversies and putting them in context with contemporary physics The unsolved problems were the agent stimulating the authors to invent a new bold unification scheme Vacuum polarisation with a vacuon a pair of strongly bound opposite signed charges as a free entity gets you back to the days of the ether concept abandoned by physics after the Michelson Morley experiment by the end of the 19 th century

Starting from constructing the fundamental building blocks for the vacuum and material particles the Newtonian Maxwellian solutions the authors obtain yield insights into fundamental concepts such as vacuum charge and mass For instance can vacuum be described by a building block denoted vacuon with or without mass depending on pushed into motion or not Can free charges be described as a mass less entity Can and how vacuum polarise However even if vacuum in the real Universe never polarises as proposed in this unification scheme it may yet serve as another tool in the physics toolbox a theoretical bridge between classical and modern physics Physics and physical theory is a human invention a mathematical description of the intrinsic properties of the Universe and its associated phenomena Our understanding of the Universe is a reaction of our mind of our way of understanding Richard Feynman once noted about the Maxwell equations something that goes like If a mathematical theory in physics cannot be proved by experiments it remains to be proved mathematically Ultimately it must be possible to test any new theory by experiments If experimental tests are not possible we are left with a mere hypothesis based on equations The unification scheme proposed by this work consists of a Proposition about the fundamental building blocks ap and n vaculeon and a series of Predictions from Newtonian Maxwellian solutions based on that Proposition The arriving at the Proposition and the Predictions relating to classical quantum and relativistic mechanics is their context The book is a challenge out of the ordinary a challenge that deserves careful consideration
