Habermas,2018-03-13 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences The New Conservatism brings to light another side of Habermas's work showing him to be an incisive commentator on a wide range of contemporary themes The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful often passionate political and cultural commentaries The central theme uniting the essays is the German problem of coming to terms within the past a problem that has important implications outside Germany as well Of particular note are the essays on what has come to be known as the Historians' Debate Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America In particular the essay on The New Obscurity combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today **Industrial World** ,1914 **Efficiency and Justice in the Industrial World:**

Architecture Theory since 1968 K. Michael Hays,2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century In the discussion of architecture there is a prevailing sentiment that since 1968 cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of

social course but must now be constructed through ever more self conscious theoretical procedures The development of interpretive modes of various stripes post structuralist Marxian phenomenological psychoanalytic as well as others dissenting or eccentric has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse This anthology presents forty seven of the primary texts of architecture theory introducing each with an explication of the concepts and categories necessary for its understanding and evaluation It also presents twelve documents of projects or events that had major theoretical repercussions for the period Several of the essays appear here in English for the first time Contributors Diana Agrest Stanford Anderson Archizoom George Baird Jennifer Bloomer Massimo Cacciari Jean Louis Cohen Beatriz Colomina Alan Colquhoun Maurice Culot Jacques Derrida Ignasi de Sol Morales Peter Eisenman Robin Evans Michel Foucault Kenneth Frampton Mario Gandelsonas Frank Gehry Jürgen Habermas John Hejduk Denis Hollier Bernard Huet Catherine Ingraham Fredric Jameson Charles A Jencks Jeffrey Kipnis Fred Koetter Rem Koolhaas Leon Krier Sanford Kwinter Henri Lefebvre Daniel Libeskind Mary McLeod Alberto Prez Gómez Jos Quetglas Aldo Rossi Colin Rowe Massimo Scolari Denise Scott Brown Robert Segrest Jorge Silvetti Robert Somol Martin Steinmann Robert A M Stern James Stirling Manfredo Tafuri Georges Teyssot Bernard Tschumi Anthony Vidler Paul Virilio Mark Wigley
