This teacher resource offers a detailed introduction to the Hands On Science program which includes its guiding principles, implementation guidelines, an overview of the science skills that grade 7 students use and develop, a classroom assessment plan complete with record keeping templates and digital reproducible student materials. *Interactions Within Ecosystems* Jennifer Lawson, 2004. The 12 lessons in this module introduce students to ecology through an exploration of ecosystems, succession, biotic and abiotic elements, food pyramids and energy cycles. Students learn to use microscopes to explore organisms. As well, they investigate environmental issues related to ecosystems and the interaction between humans and other living organisms. Also included are materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record keeping templates. **Holt Science**, 1986 **Journal of Geoscience Education**, 2007 *Life Science* William L.
