Parameter Setting In Language Acquisition Dalila Ayoun:

Parameter Setting in Language Acquisition Dalila Ayoun, 2005-02-28 This book provides a broad overview of parameter setting theory in first and second language acquisition and refines the theory by revisiting and challenging the traditional assumptions that underlie it based on cross linguistic language data that cover a range of syntactic and phonological phenomena From an historical perspective on parameter setting theory to an introduction to its role in computational linguistics neurolinguistics and language change the reader will find a critique of the most commonly made arguments as well as an index of all the syntactic phonological lexical and morphological parameters presented in the literature to date A closer look at the theory itself addresses the following questions What does a parameter setting approach to language acquisition entail What are the underpinnings of the theory What issues and problems remain to be solved The empirical studies carried out to test the null subject parameter and verb movement parameter are reviewed to re examine long standing theoretical assumptions as well as the learnability implications for first and second language acquisition The

Second Language Acquisition of French Tense, Aspect, Mood and Modality Dalila Ayoun, 2013-07-04 Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners So far the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality neglecting the acquisition of the expression of the present and future temporalities with rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole This monograph addresses this question by focusing on three main objectives a to contribute to the already impressive body of research in the L2 acquisition of tense aspect and mood modality from a generative perspective and in so doing to present a more complete picture of the processes of L2 acquisition in general b to bridge the gap between linguistic theory and L2 acquisition c to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications *Young Language Learners' Motivation and Attitudes*

Sybille Heinzmann, 2013-06-20 Taking three different perspectives this book looks at primary school children s language learning motivation and language attitudes In adopting a longitudinal perspective the book fills a research gap and provides a macro level analysis of motivational development over time It reveals a surprising amount of stability in primary school children s motivational and attitudinal development The comparative perspective looks at the learners affective dispositions with regard to English theorized as a global language and French theorized as a national language The comparisons between global language and national language are relevant across the world especially in situations where instruction in languages other than English struggles to get attention The results reveal sizeable differences between the two languages with children being substantially more motivated to learn English than to learn French Finally the explanatory section identifies key antecedents of the learners motivational and attitudinal dispositions and thereby opens up paths for intervention relevant for

those working in the field of language instruction The L2 Acquisition of Spanish Subjects Margaret Quesada,2015-07-01

There is a long overdue need to address the sharp philosophical and methodological divide between formal generative and functional discourse perspectives in contemporary theoretical linguistics and L2 acquisition Language structure in general and the use of subjects in particular is dependent upon multiple syntactic lexico semantic and discourse pragmatic factors Therefore the study of L2 acquisition must be equally multi faceted This volume examines data from over twenty years of research in the L2 acquisition of Spanish subjects from several theoretical perspectives including generative approaches processing theory discourse pragmatics and sociolinguistic variationist models By so doing the author seeks to fulfill two principal objectives the first is to determine the many linguistic and extra linguistic properties of Spanish subjects that constrain their acquisition and use and the second is to establish common ground among researchers from varied theoretical persuasions in acquisition studies The author argues throughout the volume that central to native speaker use and L2 acquisition are universal properties ranging from highly specific syntactic principles to more general characteristics of human cognition and a range of these properties is responsible for language acquisition An examination of the diverse body of research that considers a wider scope of universal properties of language can thus bring us closer to a unified account of the L2 acquisition of Spanish subject expression *Arabic Second Language Learning and Effects of Input, Transfer, and Typology* Mohammad T. Alhawary,2019-02-25 Despite the status of Arabic as a global language and the high demand to learn it the field of Arabic second language acquisition remains underinvestigated Second language acquisition findings are crucial for informing and advancing the field of Arabic foreign language pedagogy including Arabic language teaching testing and syllabus design Arabic Second Language Learning and Effects of Input Transfer and Typology provides data driven empirical findings for a number of basic and high frequency morphosyntactic structures with two novel typological language pairings examining Arabic second language acquisition data from adult L1 Chinese and Russian speaking learners of Arabic as a foreign language Alhawary s study examines the different processes hypotheses and acquisition tendencies from the two learner groups and documents the extent of the successes and challenges faced by such learners in their L2 Arabic grammatical development during the first three years of learning the language In addition the book offers both theoretical and practical implications related to input exposure L1 and L2 transfer and typological and structural proximity effects This book serves as a valuable resource for both second language acquisition experts and foreign language teaching practitioners

Research Design and Methodology in Studies on L2 Tense and Aspect M. Rafael Salaberry,Llorenç

Comajoan,2013-03-22 Research Design and Methodology in Studies on Second Language Tense and Aspect provides an up to date review of past and current methodologies for the study of the L2 acquisition of tense and aspect More specifically the book addresses the following issues related to the design of studies for research in tense and aspect Theoretical frameworks e g Are research questions investigated within one theoretical approach incompatible with other approaches Elicitation

procedures Do different types of tasks elicit different types of tense aspect data Coding of data e g How are lexical categories defined and coded Data analysis e g What statistical tests are more appropriate to analyze language data The volume provides new insights into the study of L2 tense aspect by bringing together well renowned scholars with experience in the research design of research this area of the field *Tense and Aspect in Romance Languages* Dalila Ayoun, M. Rafael Salaberry, 2005-01-01 LC number 2005050068 *Parameter Theory and Linguistic Change* Charlotte Galves, Sonia Cyrino, Ruth Lopes, Filomena Sandalo, Juanito Avelar, 2012-11-01 This book focuses on some of the most important issues in historical syntax In a series of close examinations of languages from old Egyptian to modern Afrikaans leading scholars present new work on Afro Asiatic Latin and Romance Germanic Albanian Celtic Indo Iranian and Japanese The book revolves around the linked themes of parametric theory and the dynamics of language change The former is a key element in the search for explanatory adequacy in historical syntax if the notion of imperfect learning for example explains a large element of grammatical change it is vital to understand how parameters are set in language acquisition and how they might have been set differently in previous generations The authors test particular hypotheses against data from different times and places with the aim of understanding the relationship between language variation and the dynamics of change Is it possible for example to reconcile the unidirectionality of change predominantly expressed in the phenomenon of grammaticalization with the multidirectionality predicted by generativist approaches In terms of the richness of the data it examines the broad range of languages it discusses and the use it makes of linguistic theory this is an outstanding book not least in the contribution it makes to the understanding of language change French Applied Linguistics Dalila Ayoun, 2007-01-11 This state of the art volume on French Applied Linguistics includes two introductory chapters the first summarizes the past present and future of French in applied linguistics and the second reviews the history of French from a sociolinguistic perspective The six chapters of the first part cover the core aspects of the second language acquisition of French phonology semantics syntax syntax morphology pragmatics sociolinguistics and grammatical gender The seven chapters of the second part explore the contribution of French in various subfields of applied linguistics such as language ideology and foreign language pedagogy corpus linguistics and French Sign Language A chapter studies the role of affective variables on language learning while another investigates natural language and lexical creativity The chapters on creole studies and applied linguistics in West Africa address issues in first and second language acquisition in complex sociolinguistic and political contexts The last chapter serves as an epilogue focusing on Louisiana a region rich in linguistic history **More than Nature Needs** Derek Bickerton, 2014-01-13 How did humans acquire cognition more powerful than a hunting gathering primate needed to survive Combining state of the art research with forty years of writing about language evolution Derek Bickerton resolves a crucial problem that both biology and cognitive science have ignored how animal thinking escaped the prison of the here and now *The Acquisition of the Present* Dalila Ayoun, 2015-10-15 This is the first edited

volume that tackles the acquisition of the present tense aspect temporality an under researched area particularly compared to the acquisition of past temporality The first two chapters focus on the L1 acquisition of English from the perspective of the Aspect hypothesis and the Verb Island hypothesis Wang Shirai and the L1 acquisition of French from the perspective of the zero tense hypothesis Demirdache Lungu The remaining chapters tackle the L2 acquisition of English Liszka Al Thubaiti Vraciu French Ayoun Saillard Spanish Gabriele et al Russian Martelle and Japanese Shirai Li by learners of different L1s French English Arabic Chinese and Korean testing various semantic and syntactic hypotheses The last chapter presents a summary of the findings and offers a few conclusions as well as broad directions for future research

Studies in French Applied Linguistics Dalila Ayoun, 2008-10-29 Studies in French Applied Linguistics invites the reader to adopt a broad perspective on applied linguistics illustrating the fascinating multifaceted work researchers are conducted in so many various inter connected subfields The five chapters of the first part are dedicated to the first and second language acquisition of French in various settings First language acquisition by normal children from a generative perspective and by children with Specific Language Impairment second language acquisition in Canadian immersion settings from a neurolinguistic approach to phonology and natural language processing and CALL The six chapters of the second part explore the contribution of French in various subfields of applied linguistics such as an anthropological approach to literacy issues in Guadeloupean Kr y l literacy issues in new technologies phonological and lexical innovations in the banlieues French in North Africa language planning and policy in Quebec as well as the emerging field of forensic linguistics from an historical perspective
