Writing an essay on how I generate artistic ideas got me thinking about how this process works. In particular, I wanted to look at it both on an individual and a broader scale. I created a visual work inspired by the theme within a piece submitted in my portfolio which is a guided reflection of myself as a 16-year-old girl with long box braids in my hair sometimes the braids are diff colors to show how I express myself as an artist. Some of my art pieces are The Power Of The Braids, Vogue Magazine Cover Self-Portrait, Art Power, Braids Gone Wild, The Smile Behind The Mask, Creepy Spiders & Artful Kitchen Expression. The artistic, creative process that leads to the creation of pieces of visual art is the engine for generating ideas. Botella et al. (2018) conducted an exciting study in which they tried to identify the stages of the creative artistic process. As part of this study, they interviewed students of art schools to describe how they create their art pieces. It is noteworthy that each of the students describes the process of creating ideas in different ways, using various terms. However, in general, the stages identified are the same for all interviewees.

This aspect surprised me because it made me clearly understand how I approach the process of generating ideas and choosing a subject for my visual art. The initial stage of the creative process is the identification of the problem or the definition of the goal of creation. For me, this stage consists of the need to search for the issue of interest to me in reality, as well as to examine it through the prism of my inner perception. The main task for me as an artist is the desire to describe objective phenomena from a subjective point of view. This combination, in my opinion, allows the artist to create a valuable piece of visual art. On the one hand, this work can relate to the viewer within a real range of problems, and on the other hand, it can affect feelings and emotions.

I think that this initial stage of goal identification is the most important for the creation of art. After realizing the need to discuss a certain topic through visual art, I reflect on how this issue makes me feel. In particular, I consider how I can convey my inner perception to the viewer and what emotions it can evoke in other people. Yokochi and Okada (2020) note that "the formation of a creative vision requires many years of accumulation of art-making activities" (p. 542). Even though I feel quite confident in creating art, I am still actively developing in this area. I devote considerable time to

between Frege's and Wittgenstein's approaches to philosophical investigations the relation between Frege and Kant and the place of Frege's work in the philosophical landscape more generally The volume is therefore of direct relevance to several current debates in philosophy in general in addition to Frege and Wittgenstein research in particular Even though Frege's great significance for contemporary philosophy is not disputed the question of how we are to understand the character and aims of his project is debated The debate has a starting point in Frege's specific conception of logic The volume elucidates this conception as well as the relation between natural language and the Begriffsschrift It will help philosophers researchers and students better understand the nuances of this great thinker By extension it will also help readers seeking to understand Wittgenstein's approach to philosophical difficulties and his struggle to find an apt form of presentation for his philosophical investigations

Hermeneutics and Social Science (Routledge Revivals) Zygmunt Bauman, 2010-03-23 Originally published in 1978 this important work by one of the leading European social theorists is arguably the best introduction to the hermeneutic tradition as a whole It is designed to help students of sociology and philosophy place the problems of understanding social science in their historical and philosophical context It does so by presenting the major current in sociological thought as responses to the challenge of hermeneutics The idea that true knowledge of social life can be attained only if human conduct is seen as meaningful action whose meaning is accordingly grasped has been presented as a discovery of recent sociology In fact its history is long and its connections plentiful reaching beyond the boundaries of sociology itself Yet it is in sociology that the hermeneutic tradition has attracted most interest but most misinterpretation The debate is in full swing and there is no attempt to offer correct solutions the emphasis instead is upon revealing the strengths and weaknesses of each of the main approaches However it is Bauman's view that the theory of understanding may achieve valid results only if it treats the problem of understanding as an aspect of the ongoing process of social life
