

Abstract

Experts in the field of fashion and psychology have contended that clothing gives information about the wearer's identity, while also delineating and communicating social identity of the wearer to the surrounding observers. Clothing (along with other personal accessories) categorizes the wearer as belonging to a certain social and economic class (rich/poor; urban/rural dweller; chairperson/factory worker), of a specific gender (like a male or a female member of the society), age (children, young adults, adults, or old people), and profession (like doctor, lawyer or a priest). Therefore, one can conclude that clothing is a mode of communication (nonverbal), which creates the first and a lasting impression of the wearer, on the observer. It is almost impossible to wear clothes without revealing to some extent the personal and social identity of the wearer, and his or her view of the world. The present study explores all existing links between clothing and personal identity, and derives that a close relationship exists between the two at different levels, while taking into consideration the wearer's gender, age, social class, religion, ethnicity and symbolism of clothing.

Personal Identity Research Paper:

The Developmental Psychology of Personal Identity Massimo Marraffa, Cristina Meini, 2024-03-21 Massimo Marraffa and Cristina Meini reconnect the psychology of identity with its philosophical roots in this study. They trace the contemporary problem of the self to John Locke and William James' foundational theories on personal identity. By integrating the philosophy of identity with empirical and neuropsychological research, Marraffa and Meini provide an original synthesis of multidisciplinary conceptions of the self. *The Developmental Psychology of Personal Identity* builds on Chomsky-inspired developmental psychology, Jean Piaget's constructivism, Lev Vygotsky's sociocultural perspective on development, and John Bowlby's attachment theory. In this theoretical framework, the book draws on the data of the psychological sciences to reconstruct the trajectory of the self as a Lockean person, i.e., as a morally responsible agent. The authors link the birth of self-consciousness through the body and emotions to the construction of a narrative self. Their combination of philosophy and cognitive sciences makes an important contribution to multiple disciplines concerned with personal identity. It provokes new routes to understanding identity and self, autobiographical memory, and personality.

Culture, Self-Identity, and Work

Miriam Erez, P. Christopher Earley, 1993-08-12 A great deal of research has recently been completed on behavior and the organization of work, most of which has viewed it from an ethnocentric perspective. In this work, Erez and Earley show how this is insufficient to develop a global theory of work behavior; it necessitates the inclusion of a cultural perspective. Solidly grounding their work in the fields of psychology, management, and anthropology, the authors propose a new theoretical framework utilizing the individual's self-concept as a means of linking cultural beliefs and social interaction to emergent work behavior. The book includes specific recommendations for structuring work environments and managerial processes to match cultural practices and enhance productivity in the workplace, making it an essential reference for scholars, students, and professionals.

Handbook of Identity Theory and Research Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22 Identity is one of the most extensively studied constructs in the social sciences. Yet despite the wealth of findings across many disciplines, identity researchers remain divided over such enduring fundamental questions as: What exactly is identity and how do identity processes function? Do people have a single identity or multiple identities? Is identity individually or collectively oriented? Personally or socially constructed? Stable or constantly in flux? The *Handbook of Identity Theory and Research* offers the rare opportunity to address the questions and reconcile these seeming contradictions, bringing unity and clarity to a diverse and fragmented literature. This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches. Contributing authors provide perspectives from psychology, e.g., narrative social identity theory, neo-Eriksonian, and from other disciplines, e.g., sociology, political science, ethnic studies, and the editors highlight the links between chapters that provide complementary insights on related subjects. In addition to covering identity processes and categories that are well known to

the field the Handbook tackles many emerging issues including Identity development among adopted persons Identity processes in interpersonal relationships Effects of globalization on cultural identity Transgender experience and identity Consumer identity and shopping behavior Social identity processes in xenophobia and genocide The Handbook of Identity Theory and Research lends itself to a wealth of uses by scholars clinicians and graduate students across many disciplines including social developmental and child school psychology human development and family studies sociology cultural anthropology gender ethnic and communication studies education and counseling Handbook of Research on Identity Theory in Marketing Americus Reed II, Mark Forehand, 2019-12-27 The Handbook of Research on Identity Theory in Marketing features cutting edge research that delves into the origins and consequences of identity loyalty and organizes these insights around five basic identity principles that span nearly every consumer marketing subdomain This Handbook is a comprehensive and state of the art treatment of identity and marketing An authoritative and practical guide for academics brand managers marketers public policy advocates and even intellectually curious consumers **Current Research and Development in Scientific Documentation** National Science Foundation (U.S.). Self and Identity : Fundamental Issues Richard D. Ashmore Professor of Psychology Rutgers University, Lee Jussim Associate Professor of Psychology Rutgers University, 1997-04-17 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline Recently psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self This volume presents a critical analysis of fundamental issues in the scientific study of self and identity These chapters go much farther than merely taking stock of recent scientific progress World class social scientists from psychology sociology and anthropology present new and contrasting perspectives on these fundamental issues Topics include the personal versus social nature of self and identity multiplicity of selves versus unity of identity and the societal cultural and historical formation and expression of selves These creative contributions provide new insights into the major issues involved in understanding self and identity As the first volume in the Rutgers Series on Self and Social Identity the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey

Personal Identity John Perry, 1975 This volume brings together the vital contributions of distinguished past and contemporary philosophers to the important topic of personal identity The first part sets forth the attempts by John Locke Anthony Quinton and H P Grice to analyze personal identity in terms of memory The eleven other selections are largely critical of this approach and provide alternative perspectives Part II contains classic contributions by Joseph Butler Thomas Reid and Sydney S Shoemaker and a new paper by John Perry Personal Identity Memory and the Problem of Circularity in which he defends some of the central features of the Locke Grice Quinton approach Part III contains three sections from David Hume's Treatise of Human Nature Our idea of Identity Of Personal Identity and an appendix which the editor has entitled Second Thoughts In the fourth part of the volume Bernard Williams discusses The Self and the Future and Derek Parfit contributes his view of Personal Identity A recurring theme throughout the work is the possibility of body transfer of a single person having at different times different bodies In the final section of the volume Brian Bisection and the Unity of Consciousness Thomas Nagel examines the philosophical implications of recent scientific research on split brain patients he discusses the possibility entertained by some researchers that such cases involve two persons simultaneously inhabiting a single body In his long introduction to this unique anthology on a topic of prime interest to the philosophical community Mr Perry scrutinizes the differing approaches and vocabularies of the various authors The editor also includes Suggestions for Further Reading

Education ,1998-05 *Modernity and Self-Identity* Anthony Giddens, 2013-04-30 This major study develops a new account of modernity and its relation to the self Building upon the ideas set out in *The Consequences of Modernity* Giddens argues that high or late modernity is a post traditional order characterised by a developed institutional reflexivity In the current period the globalising tendencies of modern institutions are accompanied by a transformation of day to day social life having profound implications for personal activities The self becomes a reflexive project sustained through a revisable narrative of self identity The reflexive project of the self the author seeks to show is a form of control or mastery which parallels the overall orientation of modern institutions towards colonising the future Yet it also helps promote tendencies which place that orientation radically in question and which provide the substance of a new political agenda for late modernity In this book Giddens concerns himself with themes he has often been accused of unduly neglecting including especially the psychology of self and self identity The volumes are a decisive step in the development of his thinking and will be essential reading for students and professionals in the areas of social and political theory sociology human geography and social psychology

Self-Identity Narratives of Chinese Students in the United States Sarah Y. Köksal, 2023-01-31 While previous research has explored the academic adaptation or acculturation processes of Chinese students studying abroad limited attention has been paid to students own perspectives and narrations of their experience To contribute to a more nuanced understanding of this highly mobile group this study takes a closer look at the students self identity narratives How do they make sense of their foreign adventure How do they position themselves among their peers and their family members as well as within the greater transnational context Based on 29 in depth biographical interviews with Chinese students in the United

States the findings show the participants continuously interpreting and revising their individual academic and cultural identities In the familial context a recurring narrative of the high potential only child could be observed Many students and their family members felt that their unique talents and personalities were not appreciated within the Chinese educational system and thus sought more holistic environments abroad
