Digination Robert C. MacDougall, 2012 The shift from orality to literacy that began with the invention of the phonetic alphabet and which went into high gear with Gutenberg's printing press more than 500 years ago helped make the modern world Some commentators have argued that this shift from orality to literacy marked a much broader cultural shift of cataclysmic proportions Today with everything from e-mail to blogs iPods and podcasts through Google Yahoo eBay and with cutting edge smart phones we find ourselves developing relationships with these newest communication tools that aren't simply allowing us to communicate faster farther and with more ease than ever before We aren't just moving around ideas data and information at unimaginable speed and scale Our interminglings and fusions with digital communication technologies are also altering both individual and group consciousness in fundamental ways how we form and sustain relationships how we think and perceive what it means to see and to feel We are remaking human identity once more and manufacturing a new kind of culture along the way The processes bound up in our digination may well be consequential to the trajectory of human evolution That time honored trope the notion that technology is not the problem rather it's how people use technology that's the problem is shown to be wanting Highlighting Marshall McLuhan's tetrads or laws of media as a primary tool of analysis R C MacDougall argues in line with other media ecologists that it's not so much how we use certain tools that matters it's that we use them More than any other technological form perhaps communication technologies play particularly powerful and systemic roles in our culture or any culture for that matter Late adopters and even abstainers are not exempt from the psychological social and cultural effects and side effects of modern digital communication technology While there are certainly varying degrees of immersion that is to say while some of us live in the high rise downtown district some at the city limits and still others out in the proverbial woods we all live in Digination today

Mopar Muscle Robert Genat, Now in paperback this book covers Chrysler's incredible series of muscle cars In 1955 Chrysler introduced the first of its famed 300 letter series cars The company designed a stylish sporty car stuffed in one of its potent Hemi engines and gave birth to the American muscle car The C 300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race When the Detroit performance wars began in earnest during the 1960s Chrysler was well positioned to build the most outrageous bodacious cars of an outrageous bodacious era cars like the famed Charger Hemi Cuda Road Runner Superbird and Challenger T A These cars dominated the dragstrips as well as the NASCAR ovals and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly they ruled the streets of America they ruled not just the streets but the drive ins and parking lots
