and Introductory Algebra Joanne S. Lockwood,Richard N. Aufmann,2013-02-12 As in previous editions the focus in PREALGEBRA INTRODUCTORY ALGEBRA 3E International Edition remains on the Aufmann Interactive Method AIM Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems Student engagement is crucial to success Presenting students

with worked examples and then providing them with the opportunity to immediately solve similar problems helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective which helps to reinforce key concepts and promote skill building. This clear objective-based approach allows students to organize their thoughts around the content and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Third Edition also features a new design enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow.

Prealgebra and Introductory Algebra Marvin L. Bittinger, David J. Ellenbogen, Judith A. Beecher, Barbara L. Johnson, 2011-01-20. Books a la Carte are unbound, three-hole punch versions of the textbook. This lower cost option is easy to transport and comes with same access code or media that would be packaged with the bound book. The Bittinger Worktext Series changed the face of developmental education with the introduction of objective-based worktexts that presented math one concept at a time. This approach allowed students to understand the rationale behind each concept before practicing the associated skills and then moving on to the next topic. With this revision, Marv Bittinger continues to focus on building success through conceptual understanding while also supporting students with quality applications, exercises, and new review and study materials to help them apply and retain their knowledge. This package contains PREALGEBRA AND INTRODUCTORY ALGEBRA 3e, a la Carte edition with MyMathLab, MyStatLab Student Access Kit.

Pre-Algebra Judith Atkinson, 2014-12-31 Pre-Algebra: Keeping It Simple provides students with a highly accessible approach to foundational mathematical concepts. The text is designed to help students develop basic math skills that will prepare them to succeed in more advanced algebra courses. The text begins with a review of mathematical processes related to whole numbers, including adding, subtracting, multiplying, dividing, rounding, and estimation. The following chapter focuses on integers with coverage of exponents, order of operations, absolute value, and square roots. In later chapters, students learn mathematical processes related to fractions and decimals. The final chapter provides students with an introduction to algebra, including working with variables, simplifying expressions, solving linear equations, and understanding proportions. Throughout the text, features emphasize application, demonstrating real-world use of the concepts in everyday life and other academic disciplines. Practice exams at the end of each chapter help students test their knowledge and reinforce key learnings. Approachable in nature and written to help students master critical knowledge, Pre-Algebra is well-suited for beginning courses in the discipline. It is an excellent choice for bridging or fast-track programs. Judith Atkinson earned her master's degree in mathematics and her Ph.D. in civil engineering at the University of Alaska Fairbanks, where she currently teaches both face-to-face and online courses as a tenured professor. Her main focus has been developmental-level algebra courses. Dr. Atkinson also teaches a math course for non-science majors, business algebra and calculus, and math for elementary school teachers. She helped develop the UAF Math Fast Track program and coauthored a textbook to go along with the program. Prior to entering the field of teaching, Dr. Atkinson worked as a civil engineer for the Alaska Department of Transportation.
