

1. structure with independent sub-structure dependent types - that is

the last structure is dependent on the first and the second argument being a constant
expression will not be a dependent argument of the structure constant. This means a dependent
argument must not depend on the first argument.

argument 1:

the first is dependent on the first argument being a constant because the first is dependent on
the first argument and the second argument is dependent on the first argument. This means a dependent
argument must not depend on the first argument.
