Cruft, Matthew H. Kramer, Mark R. Reiff, 2011-07-14 For many years Antony Duff has been one of the world s foremost philosophers of criminal law This volume collects essays by leading criminal law theorists to explore the principal themes in his work In a response to the essays Duff clarifies and develops his position on central problems in criminal law theory Some of the essays concentrate on the topic of criminalization That is they examine what forms of conduct including attempts offensiveness and negligence can aptly qualify as criminal offences and what principled limits if any should be placed on the reach of the criminal law Several of the other essays assess the thesis that punishment is justifiable as a form of communication between offenders and their community Those essays examine the presuppositions about the nature and

function of community and about the moral structure of atonement that must be embraced if communication is to be a primary role for punishment The remaining essays examine the nature and limits of responsibility in the law as they engage with philosophical debates over moral luck by investigating the ways in which the law can legitimately hold people responsible for events that were not within their control These chapters tie the first and third parts of the book together as they explore the relationship between the principles that determine a person's responsibility and the principles that determine which types of actions can appropriately be criminalized Finally Duff responds with comments that seek to defend and clarify his views while also acknowledging the correctness of some of the critics' objections

 These are not just poems written by an average teenager These are not even poems These are slices samples and bite sizes of thoughts of a strange teenager These are words arranged in a straight forward fashion These are voices asking to be heard not necessarily asking for agreement but would enjoy some affection Some of them are love poems that contain traces of cheese and corn Others are abstract ideas images miniatures of the landscape within a person's mind Again some are stories speeches and plain mockery The poems are divided into sections of 11 colors all in appropriate colour moods and themes In a sense it is a language palette as well

The Variety of Values Susan R. Wolf, 2015 For over thirty years Susan Wolf has been writing about moral and nonmoral values and the relation between them This volume collects Wolf's most important essays on the topics of morality love and meaning ranging from her classic essay Moral Saints to her most recent The Importance of Love Wolf's essays warn us against the common tendency to classify values in terms of a dichotomy that contrasts the personal self interested or egoistic with the impersonal altruistic or moral On Wolf's view this tendency ignores or distorts the significance of such values as love beauty and truth and neglects the importance of meaningfulness as a dimension of the good life These essays show us how a self conscious recognition of the variety of values leads to new

understandings of the point the content and the limits of morality and to new ways of thinking about happiness and well being **Toast** David Brown,2009-12-21 A lepidoptery of unavoidable ideas pinned down and polished over the years
