Robert Morris Robert Morris, Centro per l'arte contemporanea Luigi Pecci, 2005 This catalogue brings together for the first time 81 of Robert Morris s Blind Time Drawings selected from the six series that make up the corpus of this work to which Morris has dedicated more than 30 years. The entire range is present from the early drawings of 1973 up to the Moral Drawings of 2000 with a particular emphasis on the fourth series a group of works inspired by the writings of the philosopher Donald Davidson Visually striking the Blind Time Drawings as the name implies were executed by the artist with his eyes covered Consisting of stark black and white contrasts explosions of graphite and obsessive markings that move organically throughout the page the works are anything but haphazard Morris followed a strict plan when doing the works and his writing which describes his process is instrumental to understanding them In addition these works are placed within the context of Morris s Minimalist and Conceptualist masterpieces such as Card File 1962 Mirrored Cubes 1965 and Portland Mirrors 1977 Notions of Temporalities in Artistic Practice Anamarija Batista, 2022-07-04 The reflections on historical and contemporary positions assembled here shed light on concepts of temporalities in the context of artistic practices In the 1960s and 1970s the pursuit for the situational processual and actual stirred up artistic and theoretical fields Nowadays contemporary practices expand on these subjects by exploring the notion of anachronism the impermanence of one s own corporeality together with the performative and ephemeral qualities of the sonic amongst other relevant concepts The goal of this publication is to offer a deep dive into situation specific settings and to fundamentally explore how temporality is able to initiate action and structure our perception thereby affecting our bodies our senses how we communicate and how the present moment is shaped Performance Drawing Maryclare Foá, Jane Grisewood, Birgitta Hosea, Carali McCall, 2020-09-03 What is performance drawing When does a drawing turn into a performance Is the act of drawing in itself a performative process whether a viewer is present or not Through conversation interviews and essays the authors illuminate these questions and what it might mean to perform and what it might mean to draw in a diverse and expressive contemporary practice since 1945 The term performance drawing first appeared in the subtitle of Catherine de Zegher's Drawing Papers 20 Performance Drawings in particular with reference to Alison Knowles and Elena del Rivero In this book it is used as a trope and a thread of thinking to describe a process dedicated to broadening the field of drawing through resourceful practices and cross disciplinary influence Featuring a wide range of international artists this book presents pioneering practitioners alongside current and emerging artists The combination of experiences and disciplines in the expanded field has established a vibrant art movement that has been progressively burgeoning in the last few years The Introduction contextualises the background and identifies contemporary approaches to performance drawing As a way to embrace the different voices and various lenses in producing this book the authors combine individual perspectives and critical methodology in the five chapters While embedded in ephemerality and immediacy the themes encompass body and energy time and motion light and

space imagined and observed demonstrating how drawing can act as a performative tool The dynamic interaction leads to a collective understanding of the term performance drawing and addresses the key developments and future directions of this applied drawing process Robert Morris Haim Chanin Fine Arts, 2003-07-01 Robert Morris Katia Schneller, 2008 Depuis le d but des ann es 1960 l Am ricain Robert Morris n en 1931 a d velopp une uvre qui se caract rise avant tout par sa diversit Art minimal art conceptuel land art ou encore performance sculpture peinture dessin criture l'artiste n a cess d explorer de nouveaux territoires au risque d'tre parfois per u comme clectique Ce livre choisit de s'attacher la notion de m moire si constamment pr sente dans l'uvre m moire physiologique exp rimentale d'un c't m moire affective m lancolique autobiographique de l autre pour ordonner cette complexit A Touch of Doubt Rachel Aumiller, 2021-02-22 What can we know about ourselves and the world through the sense of touch and what are the epistemic limits of touch Scepticism claims that there is always something that slips through the epistemologist s grasp A Touch of Doubt explores the significance of touch for the history of philosophical scepticism as well as for scepticism as an embodied form of subversive political religious and artistic practice Drawing on the tradition of scepticism within nineteenth and twentieth century continental philosophy and psychoanalysis this volume discusses how the sense of touch uncovers contradictions within our knowledge of ourselves and the world It questions 1 what we can know through touch 2 what we can know about touch itself and 3 how our experience of touching the other and ourselves throws us into a state of doubt This volume is intended for students and scholars who wish to reconsider the experience of touching in intersections of philosophy religion art and social and political Have I Reasons Robert Morris, 2008-03-14 A compilation of seminal works by Robert Morris influential artist and practice critic a key figure in Minimalist sculpture Process Art and Earthworks **Systems We Have Loved** Eve Meltzer, 2013-07-02 By the early 1960s theorists like L vi Strauss Lacan Foucault and Barthes had created a world ruled by signifying structures and pictured through the grids of language information and systems Artists soon followed turning to language and its related forms to devise a new conceptual approach to art making Examining the ways in which artists shared the structuralist devotion to systems of many sorts Systems We Have Loved shows that even as structuralism encouraged the advent of conceptual art it also raised intractable problems that artists were forced to confront Considering such notable art figures as Mary Kelly Robert Morris Robert Smithson and Rosalind Krauss Eve Meltzer argues that during this period the visual arts depicted and tested the far reaching claims about subjectivity espoused by theorists She offers a new way of framing two of the twentieth century s most transformative movements one artistic one expansively theoretical and she reveals their shared dream or nightmare of the world as a system of signs By endorsing this view Meltzer proposes these artists drew attention to the fictions and limitations of this dream even as they risked getting caught in the very systems they had adopted The first book to describe art s embrace of the world as an information system Systems We Have Loved breathes new life into the study of conceptual art Bruce Nauman Adi Louria Hayon, 2024-05-06 To date scholars explored Bruce Nauman s oeuvre
