 Anaya, 2012-09 Your company's Intellectual capital is the unique knowledge and skills your senior employees have gained
 through many years of experience This intellectual capital will begin to dissipate as senior experienced employees retire or
 resign The question you may want to ask is how can you capture transfer and preserve your company's intellectual capital

before your senior experienced employees retire Today many companies are implementing ways to capture and transfer the skills and knowledge gained by senior employees to younger employees Without a process in place younger employee will take longer to competently perform the job left vacant by the retiring experienced employees Without adequate knowledge capture and transfer between employee generations companies experience depletion in intellectual capital and knowledge assets This book describes a Knowledge Transfer KT Program that incorporates training and development strategies I have used throughout my professional career as an Instructional System Development ISD practitioner The strategies embedded in the knowledge transfer program when implemented as designed will enable your company to transfer the knowledge skills of your senior employees to the next generation of junior employees in four years Once you achieve the KT Program goals you can suspend the program if existing programs are able to maintain the achieved employee competence levels If it is evident that existing programs will not be able to maintain the employee competence levels I recommend that you integrate KT Program components describe in the book into existing programs The processes procedures and tools describe in this book have been proven to work through extensive use in actual knowledge transfer situations involving industrial and professional disciplines The processes procedures and tools are highly user friendly utilize current word processing technologies and can be easily integrated into existing automated processes if so desired *Building Services Journal* ,2003
