Social and Legal Theory in the Age of Decoloniality Artwell Nhemachena, Victor Warikandwa, 2018-06-07 Right from the enslavement era through to the colonial and contemporary eras Africans have been denied their human essence portrayed as indistinct from animals or beasts for imperial burdens Africans have been historically dispossessed and exploited Postulating the theory of global jurisprudential apartheid the book accounts for biases in various legal systems norms values and conventions that bind Africans while affording impunity to Western states Drawing on contemporary notions of animism transhumanism posthumanism and science and technology studies the book critically interrogates the possibility of a jurisprudence of anticipation which is attentive to the emergent New World Order that engineers human beings to become nonhumans while nonhumans become humans Connecting discourses on decoloniality with jurisprudence in the areas of family law environment indigenisation property migration constitutionalism employment and labour law commercial law and Ubuntu the book also juggles with emergent issues around Earth Jurisprudence ecocentrism wild law rights of nature Earth Court and Earth Tribunal Arguing for decoloniality that attends to global jurisprudential apartheid this tome is handy for legal scholars and practitioners social scientists civil society organisations policy makers and researchers interested in transformation decoloniality and Pan Africanism

Africa's Gene Revolution Matthew A. Schnurr, 2019-11-07 As development donors invest hundreds of millions of dollars into improved crops designed to alleviate poverty and hunger Africa has emerged as the final frontier in the global debate over agricultural biotechnology The first data driven assessment of the ecological social and political factors that shape our understanding of genetic modification Africa s Gene Revolution surveys twenty years of efforts to use genomics based breeding to enhance yields and livelihoods for African farmers Matthew Schnurr considers the full range of biotechnologies currently in commercial use and those in development including hybrids marker assisted breeding tissue culture and genetic engineering Drawing on interviews with biotechnology experts alongside research conducted with more than two hundred farmers across eastern western and southern Africa Schnurr reveals a profound incongruity between the optimistic rhetoric that accompanies genetic modification technology and the realities of the smallholder farmers who are its intended beneficiaries Through the lens of political ecology this book demonstrates that the current emphasis on improved seeds discounts the geographic social ecological and economic contexts in which the producers of these crops operate Bringing the voices of farmers to the foreground of this polarizing debate Africa s Gene Revolution contends that meaningful change will come from a reconfiguration not only of the plant s genome but of the entire agricultural system
