A FRESH LOOK AT ORIGINS Understanding and Reconnecting with Our Spiritual Roots Carolyn Galloway Garnes, 2011

Reconnecting Form and Meaning Caroline Gentens, Lobke Ghesquière, William B. McGregor, An Van linden, 2023-02-15

This volume is intended as a celebration of Kristin Davidse's work and its impact within the broad traditions of cognitive functional and usage based grammars. Reflecting this wide functionalist lens, the contributions develop ideas central to Neo-Firthian theories of grammar in particular Semiotic Grammar and SFL, the Prague School Functional Discourse Grammar, FDG, and broader cognitive functional e.g. Construction Grammar and usage based approaches e.g. Entrenchment and Conventionalization theory, corpus based sociolinguistics. The range of topics addressed makes the volume particularly relevant to linguists investigating information structure, construction grammar, functional discourse grammar, spatial deixis, pronoun and case systems, and/or the semantics of verbal constructions.

Reconnecting Language Anne-Marie Simon-Vandenberghe, Kristin Davidse, Dirk Noël, 1997-10-31. Although the contributors to this book do not belong to one particular school of linguistic theory, they all share an interest in the external functions of language in society and in the relationship between these functions and internal linguistic phenomena. In this sense, they all take a functional approach to grammatical issues. Apart from this common starting point, the contributions share the aim of demonstrating the non-autonomous nature of morphology and syntax and the inadequacy of linguistic models which deal with syntax, morphology, and lexicon in separate independent components. The recurrent theme throughout the book is the inseparability of lexis and morphosyntax, of structure and function of grammar and society. The third and more specific common thread is case, which in some contributions is adduced to illustrate the more general point of the link between word form on the one hand and clausal and textual relations on the other hand, while in other papers it is at the centre of the discussion. The interest of the proposed volume consists in the fact that it brings together the views of leading scholars in functional linguistics of various denominations on the place of morphosyntax in linguistic theory. The book provides convincing argumentation against a modular theory with autonomous levels, the dominant framework in mainstream 20th century linguistics, and is a plea for further research into the connections between the lexicogrammar and the linguistic and extralinguistic context.

Reconnecting Reading and Writing Alice S. Horning, Elizabeth W. Kraemer, 2013-09-06. *Reconnecting Reading and*

Writing explores the ways in which reading can and should have a strong role in the teaching of writing in college. *Reconnecting Reading and Writing* draws on broad perspectives from history and international work to show how and why reading should be reunited with writing in college and high school classrooms. It presents an overview of relevant research on reading and how it can best be used to support and enhance writing instruction.

Reconnection Betty Jean

Craige, 2010-11-01. An openly polemical work, *Reconnection* seeks a way of returning the humanities to their place at the center of human life. For the past three hundred years, to study the humanities has implied an isolation from politics, science,

and society Literary studies in particular have often fallen prey to this isolation by viewing novels plays and poems as impassive verbal icons as texts to be explicated without reference to political context or social significance Seeking a way of ending this self imposed exile of the humanities from the turmoil of social issues and concerns Betty Jean Craige looks to the contextual nondisciplinary thought that began to take hold in academia during the 1960s a development that echoed the rising political awareness brought to the universities by the Vietnam War the civil rights movement and women s liberation Recently this emergent openness in the university has come under attack by conservative critics who have sought to roll back the movement for nontraditional inquiry in academia and to reassert the dominance of hierarchical canonical thought By tracing the ideological history of literary studies Craige shows that this reactionary goal of reimposing canonical thought is in time doomed to failure the age of the discipline is over In its place Craige calls for the creation of a holistic system of learning that will emphasize interdisciplinary and nondisciplinary research reconnecting literary studies with history and philosophy with science and politics restoring literature itself to a central place in our intellectual discourse and social debate

Coviability of Social and Ecological Systems: Reconnecting Mankind to the Biosphere in an Era of Global Change Olivier Barrière, Mohamed Behnassi, Gilbert David, Vincent Douzal, Mireille Fargette, Thérèse Libourel, Maud Loireau, Laurence Pascal, Catherine Prost, Voyner Ravena-Cañete, Frédérique Seyler, Serge Morand, 2019-03-12 This book considers the principle of sustainable development which is currently facing a growing environmental crisis A new mode of thinking and positioning the ecological imperative is the major input of this volume The prism of co viability is not the economics of political agencies that carry the ideology of the dominant conventional economic schools but rather an opening of innovation perspectives through science This volume through its four parts more than 40 chapters and a hundred authors gives birth to a paradigm which crystallizes within a concept that will support in overcoming the ecological emergency deadlock

Reconnecting Consumers, Producers and Food Moya Kneafsey, 2008-11-15 Reconnecting Consumers Producers and Food presents a detailed and empirically grounded analysis of alternatives to current models of food provision The book offers insights into the identities motives and practices of individuals engaged in reconnecting producers consumers and food Arguing for a critical revaluation of the meanings of choice and convenience Reconnecting Consumers Producers and Food provides evidence to support the construction of a more sustainable and equitable food system which is built on the relationships between people communities and their environments

Reconnecting Aestheticism and Modernism Bénédicte Coste, Catherine Delyfer, Christine Reynier, 2016-10-04 Charting the period that extends from the 1860s to the 1940s this volume offers fresh perspectives on Aestheticism and Modernism By acknowledging that both movements had a passion for the new it goes beyond the alleged divide between Modernism and its predecessors Rather than reading the modernist credo Make it New as a desire to break away from the past the authors of this book suggest reading it as a continuation and a reappropriation of the spirit of the New that characterizes Aestheticism Basing their arguments on

recent reassessments of Aestheticism and Modernism and their articulation contributors take up the challenge of interrogating the connections continuities and intersections between the two movements thus revealing the working processes of cultural and aesthetic change so as to reassess the value of the new for each Attending to well known writers such as Waugh Woolf Richardson Eliot Pound Ford Symons Wilde and Hopkins as well as to hitherto neglected figures such as Lucas Malet L S Gibbon Leonard Woolf or George Egerton they revise assumptions about Aestheticism and Modernism and their very definitions This collection brings together international scholars specializing in Aestheticism or Modernism who push their analyses beyond their strict period of expertise and take both movements into account through exciting approaches that borrow from aesthetics philosophy or economics The volume proposes a corrective to the traditional narratives of the history of Aestheticism and Modernism revitalizing definitions of these movements and revealing new directions in aestheticist and modernist studies **Reconnecting Business Schools with Business** Nicholas

O'Regan, George Feiger, 2025-12-02 Reconnecting Business Schools with Business is a provocative call to action for business schools worldwide This groundbreaking book argues that traditional business schools have strayed from their core mission to be professional schools that directly serve and advance the practice of business Drawing parallels to medical and architectural schools the authors contend that business schools should be deeply intertwined with the professional world fostering collaboration between academics and practitioners They challenge the prevailing trend of mimicking academic social science disciplines arguing that this has led to a disconnect between theory and practice This book doesn't just critique it offers a blueprint for transformation It delves into the need for greater engagement with businesses the integration of technology in education and the crucial role of ethics and social responsibility The book provides a framework for business schools to reclaim their relevance and prepare students for the complexities of the 21st century With contributions from over 20 of the leading business schools deans worldwide and a range of business and regulatory stakeholders this book is essential reading for educators administrators business leaders and anyone concerned about the future of management education Discover how to create a truly professional business school that empowers individuals and organisations to thrive in an ever changing world Magnetic Reconnection Walter Gonzalez, Eugene Parker, 2016-02-22 This book provides an

reconnection energy conversion processes fast reconnection mediated by plasmoids rapid reconnection and magnetic field topology Further chapters consider specific areas of application such as magnetospheric dayside and tail reconnection comparative reconnection in planetary systems and reconnection in astrophysical systems The book offers insight into discussions about fundamental concepts and key aspects of MR access to the full set of applications of MR as presently known in space physics and in astrophysics and an introduction to a new related area of study dealing with the annihilation of quantum magnetic fluxes and its implications in the study on neutron star activity The book is aimed primarily at students entering the field but will also serve as a useful reference text for established scientists and senior researchers
